NITE IZE® INNOVATION

HELMET MARKER PLUS™

LED

Attached securely onto your helmet, the active LED illumination and passive reflectivity of the Helmet Marker Plus provides added visibility in the dark of night.

The Helmet Marker Plus makes you clearly obvious from behind in dark and inclement weather. The included hook-and-loop strips allow for the secure placement of your choice on your helmet. It features a surprisingly thin, durable polymer strip encased in weather-resistant nylon fabric, decorated with a reflective pattern for extra visibility. Press once for steady glow, twice for continuous flash, put your helmet on, and your helmet becomes a beacon that makes you brightly obvious to the cars/skiers/cyclists behind you. The bonus Gear Tie Reusable Rubber Twist Tie offers a convenient second attachment option-just twist the ends to secure the Helmet Marker Plus around your seat post, backpack strap, handlebars, baskets, or rack.

- Bright Red LED Illumination - Glow or Flash Modes
- Passive High Visibility Reflective Pattern
- Easily replaceable 1 x 2032 3V lithium battery included
- 75 hour battery life
- Lightweight, flexible design
- Easy to attach and remove - no tools required
