The size chart is only a guide, so in some instances you may wish to call us and ask for advice to get a perfect fit. (269) 358-4856

When you put on an Aquaman wetsuit, you need to pull the legs up first, just under your calves and work your way up. After this you can put on the top of the suit. The sleeves should come above your wristwatch.

You need to keep in mind that Aquaman wetsuits are cut shorter than the conventional suit to allow faster removal and quick transition.

**Remember, that the worst enemy of the neoprene is fingernails.** You can stretch neoprene a lot, but a sharp object will make a hole very easily.

## Sizing information ONLY for the ART Model

The ART is an extremely compressed wetsuit. You must make sure that you choose the correct size otherwise the suit will be under too much stress and could weaken the strength of the neoprene over the long term. The suit is intended for elite swimmers who have a slim body type.

Men's Sizes	XS	S	M	L	XL	XXL
