

BOYS' TOPS

STEP 1: MEASURE YOURSELF

1. Waist: Measure around the narrowest part (typically the small of your back and where your body bends side to side), keeping the measuring tape horizontal.
2. Hips: Measure around the fullest part of your hips, keeping the tape horizontal.
3. Height: Without shoes, measure straight down from the crown of your head to the floor.

STEP 2: FIND YOUR SIZE

Use the chart below to determine your size. If you're on the borderline between two sizes, order the smaller size for a tighter fit or the larger size for a looser fit. If your measurements for chest and waist correspond to two different suggested sizes, order the one indicated by your chest measurement.

KIDS' WETSUITS

STEP 1: MEASURE YOURSELF

Length: Your wetsuit should land right at the cuff of your wrist and ankles. Too short or too long will contribute to discomfort and the flushing of water.

No Excess Material: Your wetsuit should fit as snug as possible for maximum performance. Any excess material will build up slack, leaving room for water to enter your suit and possible chafing when paddling.

STEP 2: FIND YOUR SIZE

Use the chart below to determine your size. If you're on the borderline between two sizes, order the smaller size for a snug, watertight fit. All body types are different – this scale provides an approximate weight and height range to find your appropriate size.
