Measure the circumference of the hand across the palm, not including the thumb, with a relaxed tape.

Not sure if you are an 8.5 or 9? Here's the answer.

All level gloves have a number that refers to the fit. This should be referred to rather than the letter sizing.

To ensure a proper fit: Measure your hand with a tape measure around the knuckles of your hand.

Measure your hand with a tape measure around the knuckles of your hand. Measure your dominant hand - the right if you are right-handed, and the left if you are left-handed.

With Level gloves if you measured 7.5 inches then you will want to look for Level gloves with size listed as 7.5.

Note: some manufacturers indicate glove sizes by inches and others by Small, Medium, Large, etc. We always indicate the size of a pair of gloves the same way the manufacturer does. Use the tables below to find your size.

**Level gloves use one size for Men's and Women's gloves...** please refer to the conversion. A glove listed as 7-S is really a Woman's medium. Level Junior gloves use their own naming convention in line with the rest of the industry.
