

## PENGUINBAGS' SIZES AND TOGS

### Choosing the right size:

The sizing of our Penguinbags has been calculated so that in the lower side between the legs reaches a point between the ankles (but not below such point to ensure safety) and the knees. Once such lower part is just 5 centimeters under the knees of the child, it is time to move to a bigger size, as otherwise his ability to move will be limited.

All our products are made with 100% cotton. When choosing a size, please take into account that shrinkage of up to 5% may occur while washing the garment. In any case, each child's body is slightly different. Please check the chart bellow for more complete information on sizes:

SIZE	REF	AGE	CM	INCHES
TODDLER SMALL	S	1 to 3 years	74-96	29" – 38"
TODDLER LARGE	L	2 to 4 years	87-110	34" – 43"
JUNIOR	XL	4 to 6 years	100-120	39" – 47"

### Choosing the right TOG:

TOG is the international unit that measures the warmth of a garment: the higher the TOG the warmer the garment is.

<b>TOG 1:</b>	<b>TOG 2.5:</b>
<b>21 - 23 °C</b>	<b>16 - 20 °C</b>
<b>69,8 - 73,4 °F</b>	<b>60,8 - 68 °F</b>

There are several factors that influence which TOG is best for your child. The main factors are:

1. The clothes the child is wearing under the garment and their quality.
2. The temperature of the room.

Our Penguinbags are available in two different TOGs:

- TOG 1 (for warmer rooms) : ideal for temperatures between 21 and 23 °C / 69 – 73 °F.
- TOG 2.5 (for colder rooms, with filling): for room temperatures between 16 y 20° C / 60 – 68 °F.
