

Sizing

Since the majority of our collection is unisex, there is a larger interval between the sizes. For that reason, several sizes are joined to give an accurate representation. With that in mind, we offer you following sizes: XXS/XS - XS/S - S/M - M/L - L/XL.

The sizes have been made with the consideration that a rain jacket is often worn with warm clothes underneath. On each rainwear product page, you will find the height of the model and which size he/she is wearing.

The measurements shown here are body measurements, meaning if you should go after the largest measurement that fit you.

Use a tape measure to measure yourself on these key areas to find the best suited size, either our tapered Womens raincoats or the classic loose-fit unisex raincoats.

Generally the Unisex raincoats are loose-fit and a half size larger than normal clothing while the Womens raincoats matching your normal clothing size. This can vary though, so go after the largest measurement that fit you for the most comfortable fit.

Guide

1. Chest is measured around the fullest part.
2. Waist is measured around the natural waistline
3. Hip is measured around the fullest part
4. Arm length is measured from the neck center back to wrist
5. Inseam is measured from the crotch to ankle
