

# Womens Size Chart

Forget the vagueness of the usual S, M, L sizes. We've developed a unique sizing system specific to women that not only takes into account your height and weight, but most importantly, your body shape. Selecting the right size for you is vital but it's also easy. All you need to do is:

**1** Select your size from the chart below.

Womens Shorts, Long Tights and 3/4 Tights - Use your height and width.

Womens Calf Tights with Stirrup - Use calf circumference at widest point.

Womens Tops - Use your chest circumference, measured at the widest point.

**2** Pick your body shape from the illustrations opposite;

'A' shaped bodies have a small waist in relation to the hip and thigh.

'H' shaped bodies have little variation in shape from waist to the hip and thigh.

**3** Decide which product you're after. You'll find the size/shape on the front of the box.

It's not like your sense of style falls asleep the moment your muscles go to work. Consequently, **SKINS** are also designed to make you look great.
