

EVERY DETAIL OF COMFORT

smith comfort

The ultimate fit goes beyond helmet headform and fit systems, to include the helmet lining and earpads. Every Smith helmet includes fully removable linings and earpads, offering cushioned comfort and customizable fit options.

⊗

Lining Design

Each Smith helmet features its own lining designed to optimize fit and airflow for the AirEvac 2 EPS channeling design.

⊗

Technical Lining Materials

Smith high-end helmets feature X-Static and Nanosilver technical lining materials. With silver-based anti-microbial features, these linings keep your helmet clean and comfortable. All linings are removable and machine washable.

⊗

Earpads

Smith earpads, with their inner surface of technical materials, provide a comfortable seal from the wind and weather on even the stormiest days. For a warm spring day, remove the earpads entirely to reduce weight and maximize cooling. All earpads are fully removable and machine washable.

Adjustable Webbing

Smith helmets feature fully adjustable helmet webbing. Tweak your helmet webbing to fit snugly under your chin for the best fit, and enjoy the plush chin pad that keeps you chafe-free all day long.

Modular Lining

Smith helmets using the Lifestyle Fit System feature a two piece, modular lining design. With independent front and rear lining pieces, users can choose a customized fit arrangement when wearing goggles under the helmet.

Goggle Clips

All Smith helmets feature removable goggle clips on the rear of the helmet. Just slide your goggle strap under the goggle clip and know that your goggles will still be there after sending it head-over-heels through blower powder. Alternately, remove the goggle clip for a weight reduction and clean silhouette while wearing your goggles under your helmet. Customize your helmet for your best days.

SMITH FIT

BOA[®]

When it came time to re-think helmet fit systems, Smith partnered with Boa[®] Technology, the world's leader in closure systems. Combining Boa's expertise in closure systems, the proven fit and comfort of Smith helmets, and a lifetime guarantee from both companies, Smith helmets with Boa fit systems ensure a great fit everyday on the mountain.

on-the-fly adjustability

BOA[®] FS360 FIT SYSTEM

Taking customized fit to the next level, Smith introduces the Boa[®] FS360 Fit System. With a full 360 degree halo design, this system advances the category by offering both forward and lateral fit adjustment. Feel the fit system snug to the head in a full halo, allowing for a "floating" effect that eliminates helmet hot spots. Offering Boa's standard intuitive, dial system for on-the-fly micro-adjustability, along with vertical adjustment options, the Boa FS360 Fit System is a best-in-class fit system, offered in Smith's market leading Vantage helmet.

VANTAGE, VANTAGE WOMEN'S

ergonomically contoured
vertical adjustability
on-the-fly adjustability

SMITH X BOA[®] FIT SYSTEM

The Smith x Boa[®] fit system is a custom developed, Smith exclusive piece. Building on the proven fit of our ergonomic head form, it offers an intuitive dial system for on-the-fly, single-handed micro-adjustment. This three-quarter haloed design offers key features of self-centering and vertical adjustability, allowing the user to achieve a perfectly customized fit.

SMITH FIT

FIT FINDER

Because we know that finding the right fit can be the single biggest factor in a helmet purchase decision, Smith and Boa partnered to create the Smith Helmet Fit Finder. Use it as a measuring tool and find the correct sized helmet before taking one out of the box. Find the right size every time.

NEW DIAL FIT SYSTEM

The new Dial Fit System utilizes intuitive righty-tighty and lefty-loosey adjustment for quick, easy, on-the-fly adjustments and a comfortable fit every time.

LIFESTYLE FIT SYSTEM (LFS)

Built around the forgiving properties of elastic, the self-adjusting Lifestyle Fit System is designed to flex around the wearer's head, providing a dynamic fit that will move as you do. Additional lateral adjustability on the fit system arms allows it to accommodate a wide range of head sizes. With the Lifestyle Fit System, you'll experience comfort and mobility from a fit system you'll never have to think about.
