WHY HAVE THE SIZES CHANGED?

The sizes have changed since the summer 2019 collection. Indeed, standardised sizes are impossible: they evolve according to the target and the gender. Each morphology is different, whatever the size, small or tall, slender or stocky. These sizes have therefore been readjusted to best fit people's profiles. The measurement range of each size has also been widened to suit the smallest and the largest.

1	BACK LENGTH	To determine the length of the back, measure from the top of the hip to the 7th cervical vertebra on the neck (the one that sticks out the most).
2	CHEST	Measure the circumference including the bust.
3	WAIST	Measure loosely around the waist
4	HIPS	Widest part of the hip including the buttock.
5	INSEAM	Crotch to ankle bone on inside of the leg.
