

What size is right for you?

Foot shapes and sizes vary greatly. Fivefingers do provide some fit adjustment, but may not fit every foot type. To achieve the best fitting results for the particular style you are interested in, we recommend you to follow the sizing chart and instructions below:

Foot length is measured in centimeters/inches and not in shoe size.

FOOT LENGTH	inches	9e1/2	9e3/4	10	10e1/4	10e1/2	10e3/4	11	11e1/4	11e1/2	11e3/4	12	12e1/4

1. Stand with your heels flush against a flat vertical wall.
2. Slide a ruler under each foot and measure the distance from the wall to the tip of the longest toe.
3. Take the longer of the two foot measurements.
4. If the foot length varies more than 0,42 cm it will be difficult to get a precise fit for both feet.
5. If the second toe is more than 0,42 cm longer than your big toe it may be difficult to get a precise fit.
