

GRADE ELITE

GT's heritage in gravel riding is laid bare in our high-end aluminum Grade Elite; GT's Triple Triangle frame with floating stays ensure the best ride on any gravel adventure. Thru-axle hubs, full-carbon forks, and while Shimano provide the groupset, we provide the excitement on a bike that's fun, flickable, and surefooted. Strap it up with all the bags and head for the hills - this is built for it.
