

AKU TACTICAL BOOTS

AIR 8000®

AIR 8000® is an AKU patented technology able to provide excellent transpiration, to keep feet dry and comfortable during outdoor activities and to ensure optimum performance even in extreme temperatures.

VIBRAM® SOLE

Our boots use a Vibram® sole which was selected for its more stable platform, deep self-cleaning lugs and positive heel brake for increased traction when descending.

IMS

IMS is a special lasting board construction system, designed by AKU to equally distribute the pressure of the foot, increasing stability even in the presence of load on the shoulders, absorbing shocks and consequently reducing the risk of injury.

GORE-TEX®

The GORE-TEX® Extended Comfort laminate provides waterproofness and a high level of breathability combined with quick-dry functionality.

All models of Tactical collections have ISO 9001 and 14001 certification

AKU is a SATRA member company
