

WHAT MAKES AQUAGLIDE THE BEST

Aquapark selection is a big decision. Here are some important points to consider before making your choice.

SUPERIOR DESIGN AND INNOVATION SETS US APART

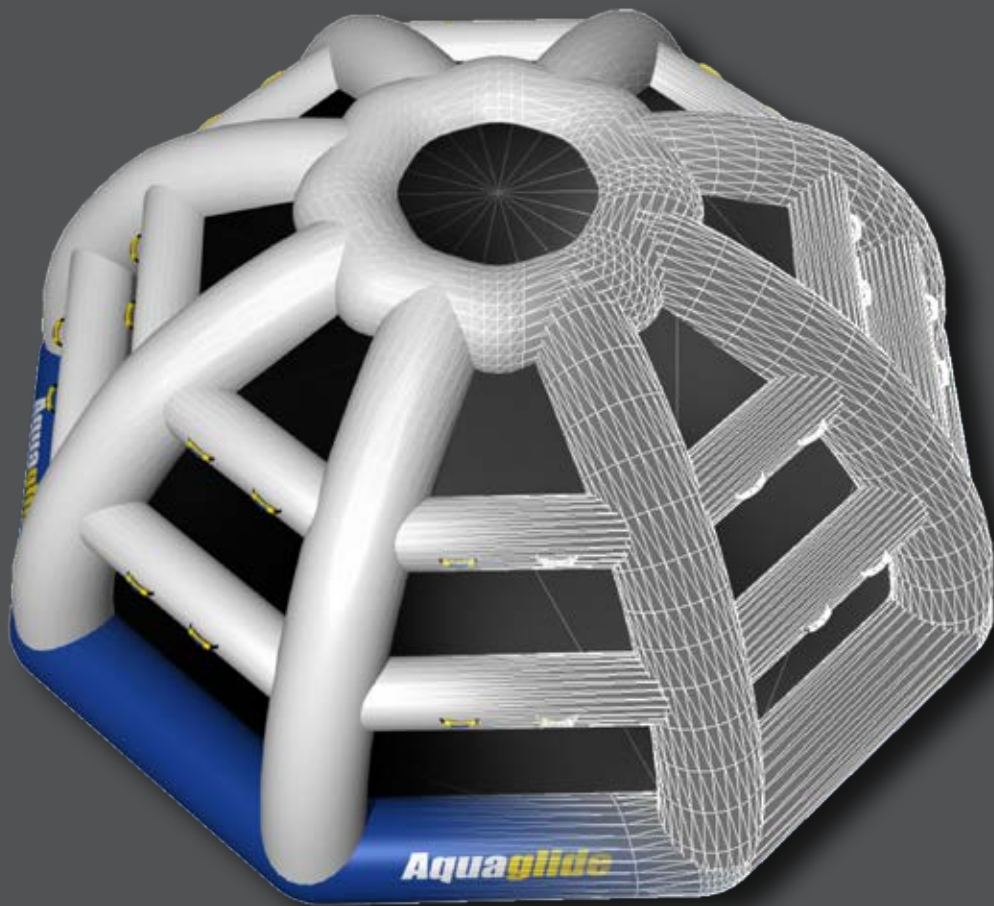

Before Aquaglide, there were no Aquaparks, only water trampolines with limited accessories. To change this, our design team developed the first in water connection system that allowed several pieces to be securely connected together with ease. We called it the Interloc System. Aquaglide also developed the Runway, the first walking platform that integrated seamlessly with our Interloc System and this quickly became an integral part of the basic Aquapark design we still use today. Innovations found in our products such as the Jungle Joe and Summit, which featured the first tubular climbing system and the first giant climbing structure and slide, respectively, are still in our lineup. Our passion for inflatable technology pushes us to constantly adapt and push the boundaries of what is possible.

INSPIRE CREATIVE FREE PLAY

Aquaglide products are designed to inspire creative free play. Participants entertain themselves, so less staff is required to constantly oversee organized games and activities. As you look through this catalog you will clearly see that, for us, the fun begins with innovations in product design. Our incentive for creating better solutions is the inspiring feedback we receive from valued customers, like you, who use and appreciate our products every day.

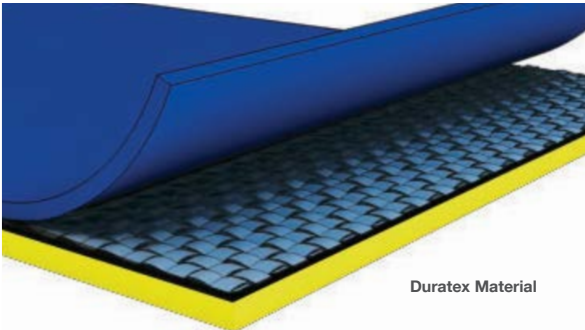

SUPERIOR VALUE

When considering Aquaparks, it is important to analyze how much your investment will cost over a 3 to 5-year period, not just the initial cost. Sure, you can find cheaper alternatives with copies of some of our items, but most are likely to last less than one season. An Aquaglide Aquapark will outlast any copycat brand 3 to 1. That means three times the lifespan, and a larger and faster ROI. Less problems, less repairs, less PVC in the landfill, and less hassle. That is what you get when you choose Aquaglide.

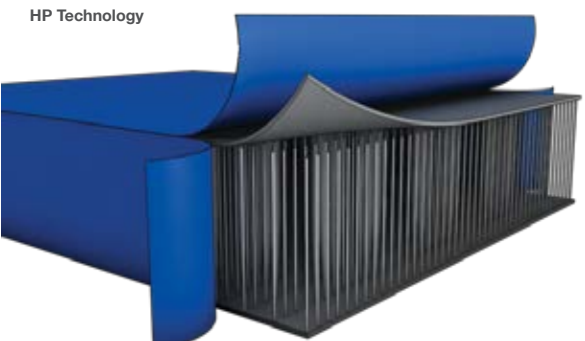

SUPERIOR MATERIALS

Duratex™ is the best quality material for commercial Aquaparks, period. Aquaglide is the only brand that works with a materials factory to develop our own exclusive formula. Our fabric reinforced PVC has better elasticity and superior adhesion which insures the best quality construction and reliability. Aquaglide is also the only brand to integrate technologically advanced HP technology material with high-pressure capability in areas where extreme durability is required.

Duratex Material

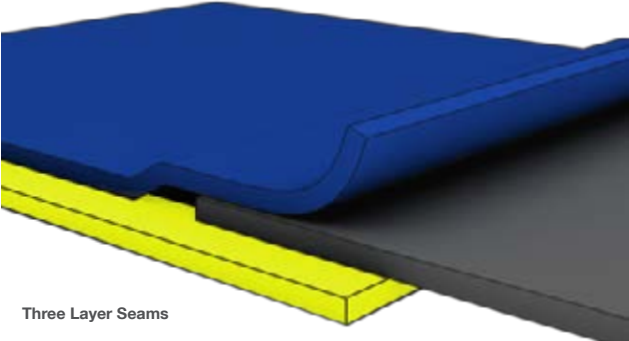

HP Technology

SUPERIOR SERVICE

Aquaglide Service centers around the world offer a full range of support including help with permitting, installation, business planning, custom design services, and maintenance. We continuously strive to provide the highest possible level of service and support to our customers. In every region around the globe, Aquaglide people are generally the ones with the most knowledge and experience in serving the needs of the most discerning camps, resorts and residential customers. If you want the best, choose to work with the best.

SUPERIOR CONSTRUCTION

Seams are generally the weak point in construction. That's why Aquaglide seams are double-welded with three layers of reinforcement for maximum strength. Our handles, D-rings and Anchor plates are also welded for maximum strength, not glued. All metal parts are made using #316 marine-grade Stainless Steel. Aquaglide construction is vastly superior to other options.

Three Layer Seams

3-YEAR WARRANTY

We stand behind our products, guaranteed. Aquaglide commercial products are not only better built, they are also backed by a 3 year warranty against any defect in material or workmanship. Do the research; you cannot find better products or better support.

THIRD-PARTY CERTIFICATION

Each and every Aquaglide product is submitted to extensive lab and field-testing to ensure that it meets and exceeds the most rigorous product safety standards on the planet. Our products are third-party certified compliant with CPSIA and EN 15649, the highest possible standards in the business. We strongly encourage customers to ask for proof of compliance when considering any supplier.

TRUST

At Aquaglide we don't just build products, we build trust. This is a process that can only be done by forging long-term partnerships with people; in this case everyone from manufacturing suppliers to the end consumer. When you make the decision to purchase an Aquaglide product you can trust that you will receive a safe, high quality product and the highest level of service available, guaranteed.

THE AQUAPARK ADVANTAGE

Aquaglide components have always been designed to easily interconnect. As the inventors of the modular Aquapark system, any of our items have been able to connect using our exclusive Vario-Lock™ cinch strap system with our Runways and Swimsteps.

We are proud to have developed a connection system that has proven to be a game changer for our industry. Our Patent Pending Universal Connection System allows unlimited park designs. This octagon shaped platform allows our Runway and Swimstep connections to connect to all eight sides at once offering multiple angles and unlimited possibilities for Aquapark design. The Universal can be used as a hub, a corner or anything in between. Park layouts can be changed quickly and easily which allows your Aquapark to evolve, so adding new exciting components is easy. With our system, you are able to start with our smallest Aquapark layout, and then use all the existing components as your Aquapark grows larger.

Understand that not all Aquaparks are created equal. Aquaglide Aquaparks are well-renowned for a jaw-dropping “wow-factor” inspired by our giant Signature items, as well as for a unique “playability” that keep participants engaged for hours without the need for formally organized activities.

HIGH PRESSURE TECHNOLOGY (HP)

Aquaglide is the only brand to integrate technologically advanced HP Technology material in Runways™ and Swimstep™ platforms.

Our exclusive HP construction utilizes high quality dropstitch material that can withstand an internal pressure of up to 20 psi (1,4 bar) without damage. This is 10 times the design working pressure! Here we use the HP material at a very acceptable 2 psi (0,14 bar), keeping it so far below its break strength that durability is never an issue. This simply cannot be said for even the best I-Beam walkway.

Make no mistake; these products are subject to extreme abuse from toes, heels, knees & elbows. They also take the worst of daily pressure extremes due to thermal expansion from the sun.

The other advantage of HB material is that it offers a smooth, flat, low-profile platform that is much easier to board from the water than an I-Beam product, and far less likely to result in loss of balance. This allows easy access to the Aquapark from almost any location.

CONNECTIONS ARE OUR STRENGTH

Strong, simple connections between products are crucial to the safe operation of any Aquapark. Our unique Vario-Lock™ cinch strap system sets the standard for safe, durable Aquapark connections and can be found on virtually every Aquaglide product. Each Vario-Lock™ cinch strap connects to heavily-reinforced, marine-grade stainless rings mounted on permanent weld plates.

Vario-Lock cinch strap

SERVICE AND SUPPORT

SUPERIOR SERVICE AND SUPPORT

We understand that the needs of resort, camp and commercial customers can be quite complex. Aquaglide Service centers and distributors around the world offer a full range of support including help with permitting, installation, business planning, custom design services, and maintenance.

With your Aquapark purchase comes training and complete advice on Aquapark mooring, staffing and maintenance, as well as official certificates, if needed, to certify your Aquapark compliance. Onsite installation and detailed staff training is also available upon request. We continuously strive to provide the highest possible level of service and support to our customers.

AQUAPARK COLLECTION

Excitement, it's the defining quality of the Aquapark game and we've got it!

Park operators from around the globe continually tell us their participants prefer the excitement of the Aquaglide experience due to the height and variety of our pieces. In keeping with Aristotle's timeless quote, "The whole is greater than the sum of its parts", we approach our Aquapark configurations with the same commitment of excellence and adventure as we do our individual pieces. Rising to the demands of our global customers, for 2018 we will segment our Aquapark configurations into three categories: Circuit, Classic, and Custom. Whether you choose one of our thoughtful designs or create one to meet your site requirements, every Aquaglide Aquapark is equipped with our signature components, providing endless excitement for the entire family.

AQUAPARK CIRCUIT:

Evolving with the ever changing needs of today's park operators, our Circuit collection highlights not only our flagship pieces but also incorporates complex and challenging circuits creating endless ways to navigate all the amazing features the Aquapark has to offer. After all, the journey should be part of the fun, right?

AQUAPARK CLASSIC:

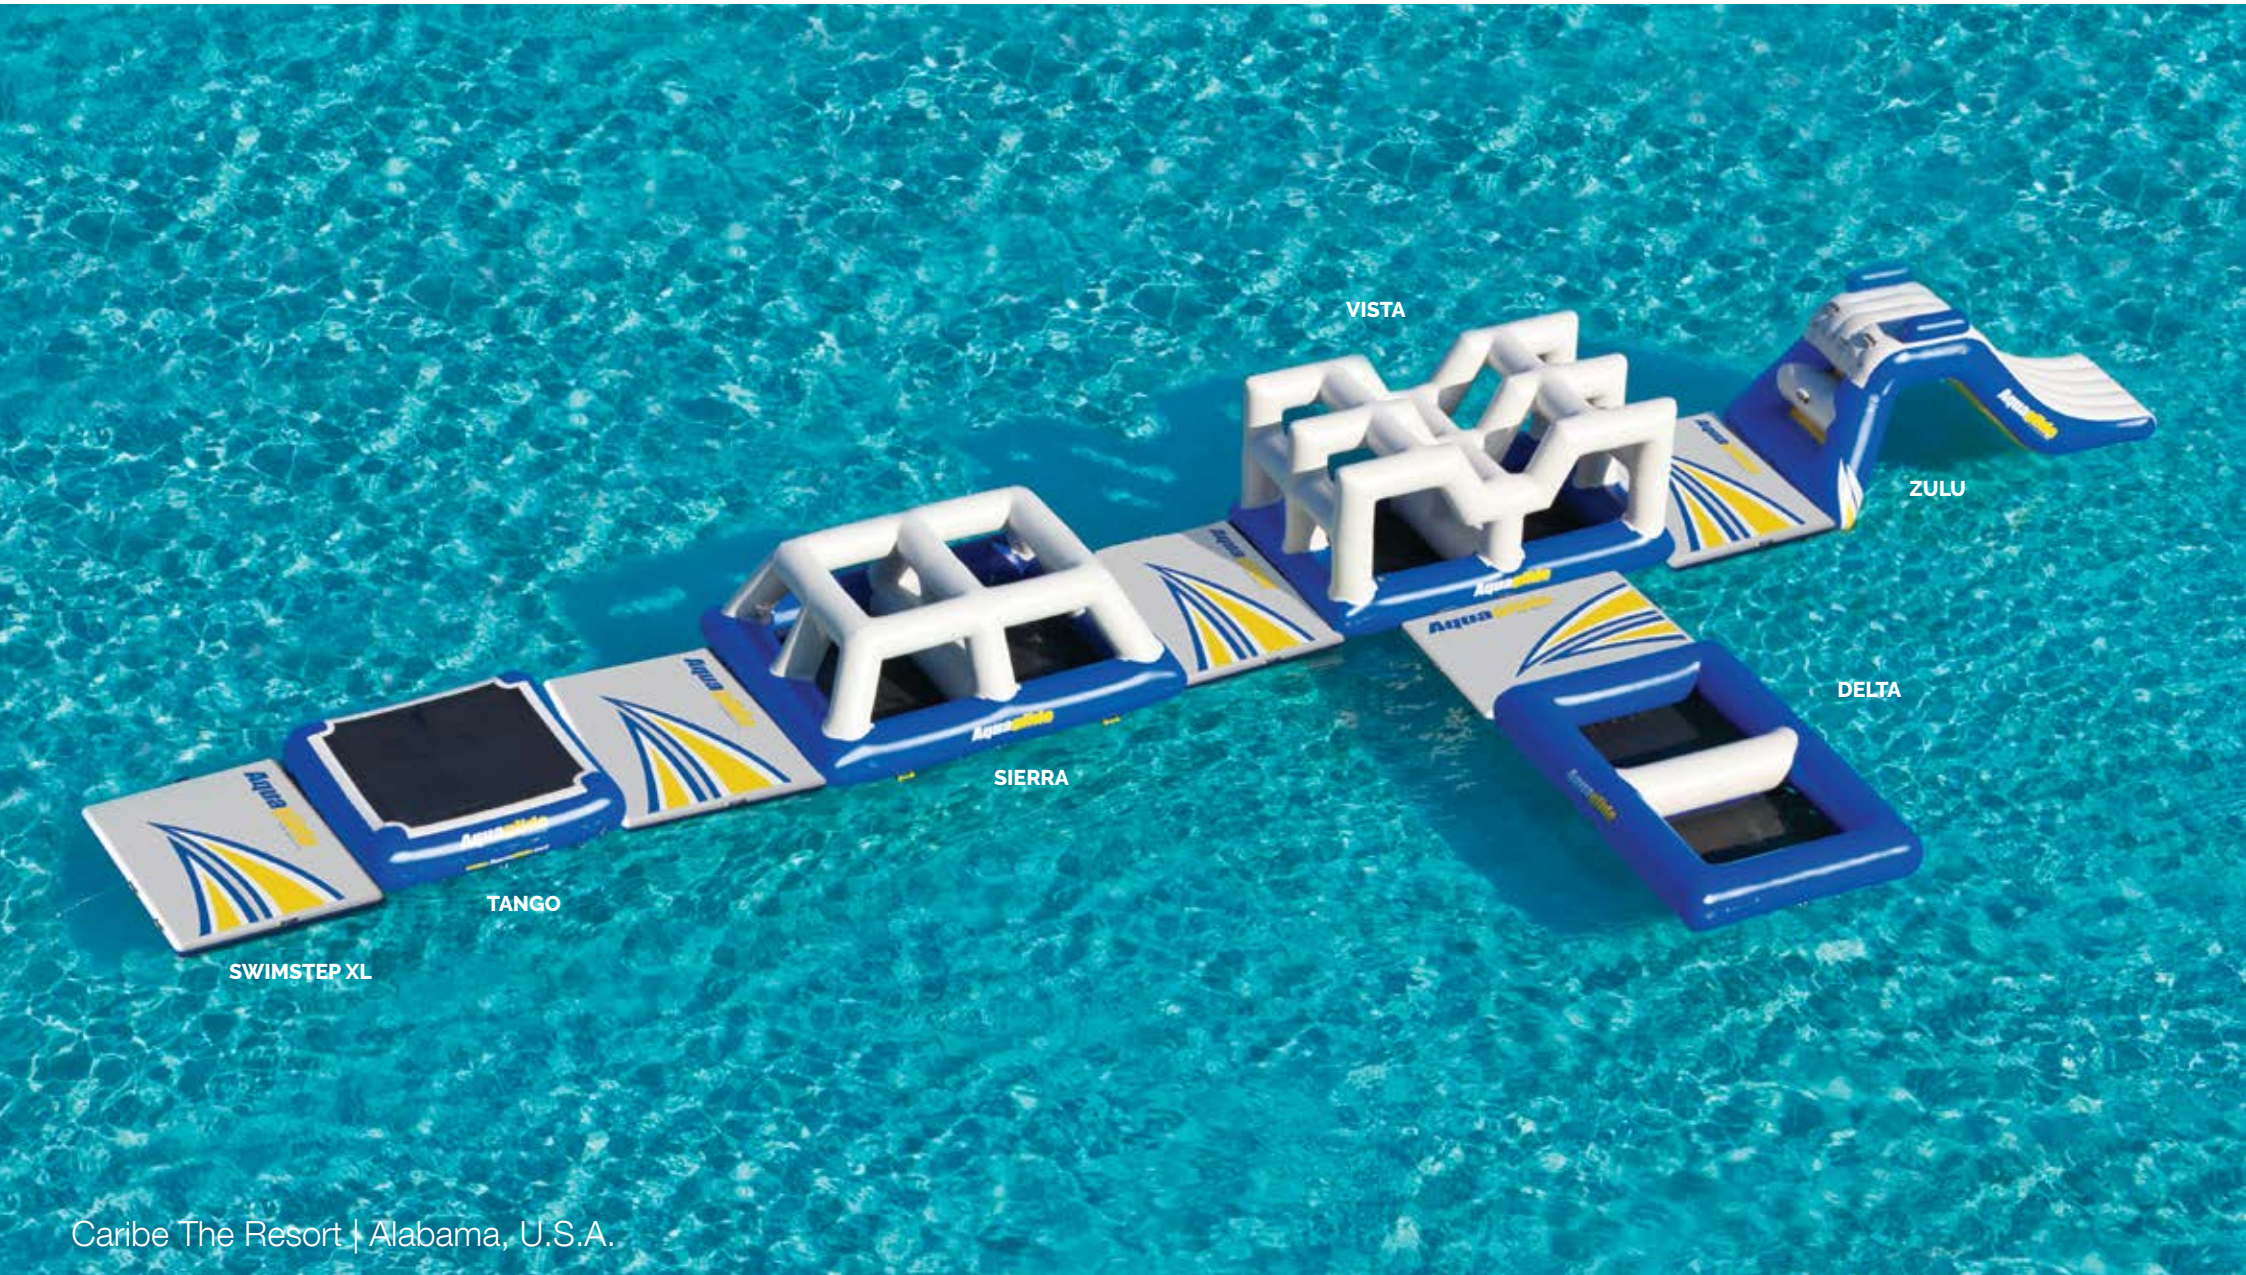

Sticking to the proven basics, our Classic collection of Aquaparks highlight the fun and excitement of each piece. Building off of our standard track system, the paths are simplified to get you to each piece faster so that the fun can begin. Simplifying the path system reduces your investment but not the fun! Each park still features our flagship pieces which will keep your guests slipping, sliding and splashing for hours.

AQUAPARK CUSTOM:

Not seeing a park layout that fits your exact needs? We have you covered! Our specialized design team can prepare a unique custom layout comprised of the exact pieces and to the exact dimensions based on your operational needs, unique bathymetry, and location.

ADVENTURE SERIES

Caribe The Resort | Alabama, U.S.A.

Our Adventure Series is a group of challenge course products for pool and waterfront use where minimum water depth is a challenge

Depth-Profiled

We understand that minimum water depth requirements are the single most limiting factor when considering any water element. Many pools and waterfronts simply don't have the water depth to support our larger items. That's why we made sure that every item in the Adventure Series offers maximum fun regardless of its size. It's also why we present a depth profile for each package we offer.

Creative Free Play

One aspect that sets all Aquaglide products apart is that they are designed to inspire creative free play. This means that participants can entertain themselves, so less staff is required to oversee games and activities. This element is clearly apparent in the Adventure Series, where each item has multiple functions and play-ways.

Easy Entry

The ultra-low profile Swimstep XL is one of the most important aspects of the Adventure Series because it allows for easy boarding from the water, not just at the 'start', but also at any station throughout the course. This allows participants to re-board safely and focus on a specific challenge.

Modular

Each Adventure Series item is designed to interconnect using the Vario-Lock cinch strap system, so the challenge course or Aquapark possibilities are limited only by your imagination. Vario-Lock cinch strap system is used on all Aquaglide products so Adventure Series items are easily combined with larger items from our Commercial Range, and vice versa.

Quick

We understand that time comes at a premium. That's why we engineered the simplest, safest and fastest way to set up and remove Adventure Series items. Each individual item includes Vario-Lock™ cinch straps for making setup and tear-down a breeze. No fussing with worn out Velcro™! In addition, nearly every item has convenient carry handles for quick, easy handling on the beach or pool deck. Taller items are designed with multiple chambers so sets can be partially deflated and easily stacked making setup and teardown quick.

SIERRA

Specifications: L 10' x W 8' x H 3.5'
(L 3m x W 2,4m x H 1,1m)
Min Depth: 5' (1,5m) Capacity: 4 users - 1000 lbs. / 454 kg
Item: 58-5213130
Box Dimensions: L 34" x W 30" x H 10", 84 lbs. 1pc.
(L 86cm x W 76cm x H 25cm, 38 kg)

TANGO

Specifications: L 6.6' x W 6.6' x H 1.5'
(L 2m x W 2m x H 0,5m)
Min Depth: 4' (1,20m) Capacity: 3 users - 400 lbs. / 181 kg
Item: 58-5213140
Box Dimensions: L 30"x W 22" x H 12", 36 lbs. 1pc
(L 76cm x W 56cm x H 30cm, 16 kg)

DELTA

Specifications: L 10' x W 6.75' x H 1.5'
(L 3,1m x W 2m x H 0,5m)
Min Depth: 4' (1,20m) Capacity: 4 users - 600 lbs. / 272 kg
Item: 58-5213110
Box Dimensions: L 30" x W 22" x H 10", 53 lbs. 1pc.
(L 76cm x W 56cm x H 25cm, 24 kg)

FOXTROT

Specifications: L 20' x W 6.5' x H 1.5'
(L 6m x W 2m x H 0,5m)
Min Depth: 4' (1,20m) Capacity: 4 users - 800 lbs. / 363 kg
Item: 58-5213120
Box Dimensions: L 30" x W 22" x H 14", 57 lbs. 1pc.
(L 76cm x W 56cm x H 36cm, 26 kg)

ZULU

Specifications: L 10.75' x W 6.5' x H 5.25'
(L 3,3m x W 2m x H 1,6m)
Min Depth: 5.7' (1,73m) Capacity: 2 users - 250 lbs. / 114 kg
Item: 58-5213160
Box Dimensions: L 30" x W 22" x H 14", 74 lbs. 1pc.
(L 76cm x W 56cm x H 36cm, 34 kg)

VISTA

Specifications: L 10' x W 6.5' x H 4.8'
(L 3m x W 2m x H 1,5m)
Min Depth: 5.4' (1,6m) Capacity: 4 users - 1000 lbs. / 454 kg
Item: 58-5213150
Box Dimensions: L 34" x W 30" x H 14", 108 lbs. 1pc.
(L 87cm x W 75cm x H 36cm, 49 kg)

SWIMSTEP XL

Specifications: L 5' x W 6.5' x H .03'
(L 1,5m x W 2m x H 0,1m)
Min Depth: 4' (1,20m) Capacity: 3 users - 400 lbs. / 181 kg
Item: HD version 58-5217627, Standard 58-5213100
Box Dimensions: L 23" x W 17" x H 6", 31 lbs. 1pc.
(L 58cm x W 43cm x H 15cm, 14 kg)

RUNWAY 10 SERIES

Specifications: L 10' x W 5' x H 0.3'
(L 3m x W 1,5m x H 0,1m)
Min Depth: 4' (1,20m) Capacity: 6 users - 1000 lbs. / 454 kg
Item: HD version 58-5217623, Standard 58-5210004
Box Dimensions: L 23" x W 17" x H 7", 39 lbs. 1pc.
(L 58cm x W 43cm x H 18cm, 18 kg)
