

The ASOLO logo is displayed in a stylized, orange-yellow font with a black outline, set against a solid black rectangular background.

## Maximum comfort with Asolo Quadrant and Ember

**Asolo offers two models of low cut trekking shoes praising a unique comfort even during the hottest days: Quadrant and Ember.  
The ideal footwear for summer walks in the mountains and for everyday use.**

In August, the temperature in the mountain can rise a lot during the sunny days. The hot climate, together with the hiking effort, can easily overheat the foot and turn your excursion into a real torture. For summer hikes on paths and non-demanding trails, and for all those terrains where technicity is not required in the fit, **Asolo** offers the exclusive comfort of **Quadrant**, dedicated to the male audience, and **Ember**, for women. These two products are part of the increasingly popular **Natural Shape** line, rewarded by numerous international awards.

The Asolo classic suede leather is combined with a breathable Nylon Mesh making it a particularly flexible, fresh and light model. Schoeller® material was instead used on the heel, ensuring better protection and extreme abrasion resistance. As for the inside of the footwear, **Asolo** opted for a lightweight velvet lining to give the foot a continuous fresh and dry sensation.

On the front of the shoe, a rubber band has been placed to protect the toes. At the same time, the shoes also praise all the top features of the **Natural Shape** products: a natural roll, stability and foot protection without neglecting high sensitivity on the ground.

Since its inception in 1975, Asolo has gained an important worldwide leadership position in the production of technical footwear for mountain activities. The wide product range covers footwear from the relaxed leisure activities line to the most technical alpine technology allowing Asolo to be one of the few companies in the world to completely cover the outdoor sector. Asolo's mission is to create personalized footwear for every situation, designing our footwear around the foot: fit and performance are the strong points. Flexible, light and at the same time resistant, Asolo footwear is designed to be breathable, shock-absorbent, and water and temperature resistant while guaranteeing maximum grip even on the toughest terrains. These characteristics have lead Asolo to receive many awards from sector magazines and organizations. Asolo is distributed in 35 countries and has a headquarters in the U.S.A. where it is a market leader.
