- > **Adjustment** 30 mm  
Adjustment plates included
- > **Ski brake** 75, 86, 91, 97 mm

> Only on pre-orders

EASY  
ENTRY  
SYSTEM

No other bindings companies dedicated such a volume of attentions the Lightweight users world: softer toe hooking, gentle and ergonomic front leverages, lower side and front release value on the heel part, everything matched with super design and cool colours.

TOURING

6 | 30 mm adjustment plate included

1 | "Easy Entry System"

2 | Included brakes  
(75, 86, 91, 97 mm)

5 | Wider braking caps

3 | Front lever pole tip protection

7 | Integrated heel flap with raiser  
(FLAT MODE, +36 mm, +50 mm)

9 | Vertical release  
Adjustment  
(Lightweight  
release 4-8)

11 | CAM RELEASE SYSTEM®

8 | Lateral release  
adjustment  
(Lightweight release 4-8)

4 | Integrated Crampons Hooks®

10 | "U.H.V." Up-hill  
Hardness Variator

- 1 | Easy Entry System : New toe geometry that optimizes the boot step-in, which results extremely reactive and powerful.
- 2 | Included Ski-brakes: the binding offers different sizes (75, 86, 91, 97) of front brakes to provide the perfect fit with any ski model.
- 3 | The lever presents a plastic protection which prevents wear and tear of the alu-lever!
- 4 | The built-in crampons slot assures the perfect insertion of any ATK BINDINGS crampon size.
- 5 | Wider brakes caps for a better braking efficiency.
- 6 | A 30 mm adjustment plate is included into the binding box to assure a fast adjustment in case of boot substitution (up to 3 full sizes)

- 7 | The heel flap with raiser provides 3 different walking modes: FLAT MODE, +36 mm and +50 mm.
- 8 | The heel provides a 4-8 adjustment range for the Side Release System (Mz), specifically developed for LIGHTWEIGHT USERS.
- 9 | The heel provides a 5-10 adjustment range for the Vertical Release System (My), specifically developed for LIGHTWEIGHT USERS.
- 10 | "U.H.V." Up-hill Hardness Variator: this system provides 5 different pre-charges for the up-hill boot clamping hardness.
- 11 | CAM RELEASE SYSTEM: stabilizes the heel pins and provides the typical torsional stiffness of the ATK bindings.
