EASY ENTRY SYSTEM

135 GRAMS

> Materials

Alu Alloys, POM, Stainless Steel

> Release Adjustable side release (5-10) fixed vertical release (4, 6, 8, 10 release value versions available)

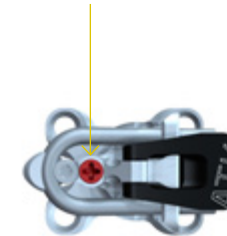

> Adjustment Optional Plates

> Always available

The SLR RELEASE introduces a new binding concept: a race toe part integrates an adjustable heel part which provides a 5 to 10 side release adjustment and 4 fixed values in the vertical release provided by the "U" spring (4, 6, 8, 10)

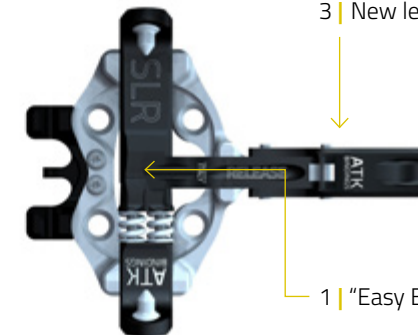

30

4 | Adjustable Side Release (Release 5-10)

2 | Monolink Technology 1.0

3 | New lever design

1 | "Easy Entry System"

7 | Heel flap with Raiser (FLAT MODE, +37 mm, +50mm)

6 | Wider Leash Hollow

5 | SRA crampons slot included

8 | Fixed Vertical Release (4 versions available 4,6,8,10)

- 1 | Easy Entry System : New toe geometry that optimizes the boot step-in, which results extremely reactive and powerful.
- 2 | Monolink Technology 1.0 : One of the toe arms does not present springs, and provides a higher locking stiffness in addition to a lower weight.
- 3 | New Lever Design: the new front lever design provides a more comfortable activation of the same, adding a seat for the pole tip stabilization during the front release.
- 4 | The side release (Mz) can be adjusted in between values 5 and 10,

- 5 | The SRA CRAMPONS SLOT is included with the binding.
- 6 | The toe lever presents a wider leash hooking hollow for a simpler insertion of the same.
- 7 | The Heel Flap with raiser provides 3 walking modes: FLAT MODE, + 37 mm and + 50 mm.
- 8 | The Vertical release (My) is provided by the "U" shaped heel spring. The binding is offered in 4 versions with four different My release values: 4, 6, 8, 10.
