The most accurate spinning bike on the market

It's time to move some watts ...

Monitor your workouts and get total control over the effort with the new console of the indoor bike WT1.

Discover all its functions:

- FTP OR PU: functional threshold power or threshold power (w).
- POWER ZONES: 5 power zones (active recovery, aerobic resistance, tempo, threshold and VO2max).
- W / KG: power to weight ratio or relative power.
- HR: heart rate or heart rate.
- HRMAX: maximum heart rate in the session.
- KCAL: Calories.
- SPEED: speed in km / h.
- DISTANCE: in km.
- LAP: Laps, average calculation of watts and rpm of each round to make training series.

Gallery

COMPATIBLE WITH MYBODYTONE®

Upload your workouts to your profile in the cloud thanks to our MyBodytone® training app and track your indoor cycling sessions.

BT CALIBRATING SYSTEM®

Each bike has been calibrated in a specialized power bank using the BT CALIBRATING SYSTEM® software to achieve incredible accuracy.

0.5% OF DEVIATION

Each bicycle records and stores the power bank information to minimize calibration deviations by up to 0.5%, making the WT1 the most accurate bicycle on the market.

CHIP DUAL BLUETOOTH 4.0

It allows communication with universal bluetooth bands to monitor the heart rate during indoor cycling training.

Indoor Bike Group®

It uses the WIFI BT CONNECT® technology, unique in real-time data transfer with the app, improving the connection through a wider bandwidth than current group apps and indoor cycling bikes on the market. Compatible with the MyBodytone® app, synchronize your workouts in the cloud!

The group indoor cycle app that analyzes and controls your training:

- Compare yourself and other users for maximum motivation.
- Connection via **WIFI BT CONNECT®**. **No interference and more data refresh** in real time.
- The unique App in the market with **unlimited users connected at the same time**.
- **View your FTP and FTP area in real time**, as well as Instant power, RPM, HR and username.
- At the end of the session the software shows the average data of the time you have been in each FTP area.
- **Export your session statistics to MyBodytone®** to control your training.

Additional information

Dimensions

128 x 61 x 112 cm

Weight

75 kg

Console

Capacitive touch screen 4.7 " with measures: 164 x 122 x 35mm. Compatible with APP My Bodytone® And Bodytone Indoor Bike Group®. Functions: HR, HRmax, FTP, W / Kg, kCal, Speed, Distance, Laps (Turns, calculation of Watts and RPM of each training's series). BT CALIBRATING SYSTEM® 95.5% of success rate.

Maximum user weight

150 kg

Flywheel

ALUMINUM. With this material we avoid rust. Equivalent to 20 kg.

Transmission

TRANSMISSION Poly V® Belt. The Poly V® has been designed for a larger contact surface than trapezoidal or flat belts. The best transmission ratio with respect to a normal belt.

Protections

Side and front guard of the flywheel and shaft manufactured in TPR, which prevents rust and corrosion caused by sweat. Rear protectors in ABS for stretching on both sides and in the central tube.

Pedals

SPD Mixed. VP Components X-93. Double use, perfect for use with cycling or common shoes.

Q Factor

160 mm

Handlebars

Ergonomic handlebar adapted from road cycling with double grip: upper and lower aerodynamic position. Vertical and horizontal sliding regulation, with 6 positions numbered by laser and printed. Porous foam coating, antiallergic and easy to clean. Easy-block positioners.

Handlebar stem

Aluminum with 7 positions numbered by laser and printed.

Bottom bracket

Special design, larger and grooved with NTN bearings, with double system on the right side. This double bearing reinforces our shaft to avoid torsion.

Saddle

Special EVA base special for indoor cycling. Coated in faux leather. Antiprostatic design with extra comfort in pelvic area.

Saddle adjustments

ALUMINUM with micro adjustments, 17 different positions in vertical and 10 horizontal positions numbered by laser and printed. Easy block positioners.

Saddlepost

Aluminium with laser numbered and printed positions.

Security

Emergency brake by intensity regulator.

Brake

Magnetic brake with four magnets of NEODYMIUM.

Accessories

PVC and Aluminium bottle support.

Structure

3 mm thick steel tube welded by robotic process.

Transport

Front wheel for easy handling.

Levellers

4 height leveller for easier stability.

Painting process

3 levels of paint. Steel pickling and stabilized by immersion. Antioxidant primer to ensure adequate isolation and 2 final coats of epoxy poliester.

Design process

Study of biomechanics and ergonomics under the supervision of professionals and associated athletes. After a long period of design; From the sketch, research in engineering, production of prototypes, checking by professional athletes before going to the market.
