

Hurricane v2 Jacket & Vest

Lightweight wind and cold proof jacket: the Hurricane Jacket V2 is designed from an innovative fibre that protects from wind while remaining fully stretchable.

Quality of its materials and design: this is the perfect choice for all your fresh outings.

3D Backpack Extensor: This structure provides an extension rate up to 200% thus enveloping your backpack whatever its volume. It allows complete freedom of movement during your runs, jumps and pushes on the ski poles.

ERGO-SHAPE
Its ergonomic shape, longer in the back than in the front along with its silicon inner lining, keeps the back well covered.

BODY FIT
BodyFit design, an adjusted and very comfortable cut that makes it possible to avoid all unpleasant draughts of air.

EXTENSIBLE FABRIC
Excellent extensibility, freedom of movement thanks to this innovative fiber.

3D BACKPACK EXTENSOR
This 3D extensor structure provides an extension rate up to 200% thus enveloping your backpack whatever its volume. It allows complete freedom of movement during your runs, jumps and pushes on the ski poles.

INVISIBLE BACK POCKETS
2 invisible pockets in the back of the jacket are extremely easy to access.

REFLECTIVE LOGO
Maximum security during your low light or night trainings. The logos are reflective and can be seen from hundreds of metres away.

ERGONOMIC COLLAR
The particular design of the collar enables free head movement while still blocking wind and cold.

ERGONOMIC ZIP
Diagonal zipper to facilitate fast opening & closing of your jacket while racing. It also add comfort in movement.

ULTRA-PACKABLE
Practical, it can be folded easily to be stored in a backpack, a belt or a small pocket.

BREATHABLE MICROFIBER
The microfiber helps evacuating the heat and improves ventilation.

ULTRALIGHT
Wet or dry, COMPRESSPORT® probably remains the most lightweight (does not retain water).

STORM PROOF
The Hurricane Jacket V2 and Vest V2 provides an excellent protection against the wind.

“Weighing just 100 grams, it offers a mix of lightweight feel and protection from wind”
