

# R2 Oxygen

**Precise and harmonious compression:** A millimetre-precision compression graduation in the targeted areas brings oxygen to the muscles and facilitates recovery.

**Ventilation:** It is super ventilated thanks to ventilation bands directly integrated in the compression, an exclusive COMPRESSPORT® innovation.

**Extreme comfort and lightness:** It is ultra comfortable thanks to its very thin fiber which brings even more softness, flexibility and elasticity for superior comfort. You do not feel it and will never feel any restriction even during very intense efforts.

### K-PROTECT

An ergonomic band which applies compression on the patellar tendon to absorb vibrations and to provide extra knee support.

### ULTRALIGHT

Wet or dry, COMPRESSPORT® R2 OXYGEN probably remains the most lightweight (does not retain water). At just 11gr, it is the lightest and most ventilated compression calf sleeve.

### ULTRA-RESIST

In normal use it is not liable to ripping.

**“30% reduction in muscle vibrations, 17% increase in muscle oxygenation and an increase of 10% to 15% venous flow”**

### COMPRESSION OXYGEN

A millimetre-precision compression graduation in the targeted areas brings oxygen to the muscles and therefore enhances performances and facilitates recovery. The muscles are supported for a feeling of strength and a better performance on a longer distance. Ultra-extensible, the fiber is also more breathable for a maximum comfort.

### ANTI-FATIGUE

By absorbing the shocks and the vibrations on the muscles, on the veins and on the articulations, the possibilities of resistance to the effort are increased.

### SHOCK ABSORBER

360° compression on the entire calf softens the effect of “shock waves” on the muscles, veins and joints.

### RECOVERY

After the workout, comfort! This product is used in recovery just after the shower (in the aircraft, at this office, at home...).

### DETOX

Studies show a significant reduction of lactic acid during exercise

### MASSAGING FIBER

Every moment activates a micro-massage bringing well-being and lightness. Patented fiber.
