

COMPRESSION OXYGEN
A millimetre-precision compression graduation in the targeted areas brings oxygen to the muscles and therefore enhances performances and facilitates recovery. The muscles are supported for a feeling of strength and a better performance on a longer distance. Ultra-extensible, the fiber is also more breathable for a maximum comfort.

ULTRA-PACKABLE
Practical, it can be folded easily to be stored in a backpack, a belt or a small pocket.

V-SHAPE BELT
Maximum comfort of the abdominal muscles while providing great support by absorbing shocks in the lower back fatigue areas. The V Shape of the belt will prevent any pressure on the stomach for optimal comfort.

HYDROPHOBIC
The water-repellent fibre wicks moisture away and evacuates sweat without absorbing it, even when excessive. No more uncomfortable heavy, damp clothing that irritates and doesn't dry.

SHOCK ABSORBER
The 360° compression dampens the "shock wave" effect on muscles, veins and joints.

MASSAGING FIBER
Every movement triggers a micromassage providing well being and lightness Patented fibre

ULTRALIGHT
Wet or dry, COMPRESSPORT® probably remains the most lightweight (does not retain water).

Trail Running Under Control Pirate 3/4 Woman

Precise compression: A millimetre-precision compression graduation in the targeted areas brings oxygen to the muscles and facilitates recovery.

Comfort: ventilation band, softness of the fiber. The integrated ventilation bands at the back of the knee provide even more comfort and freedom of movement.

Lightweight and packable: it meets perfectly the requirements of mandatory equipment for ultra long distance races such as UTMB®. Extremely lightweight and compact, it folds easily to fit in a pocket or backpack.

POWER-CLIMB GRIP
Thanks to the silicone printing, your hands stay on your thighs without slipping. Ideal for climbs, particularly during exercise repetitions.

FLAT OVER LOCK
This unique and exclusive sewing technique guarantees maximum comfort and solidity in the seams.

ERGO-FIT
Perfect fit, maximising efficiency and comfort (no chafing).

THERMO-REGULATION
Its unique weaving favors the circulation of the air and allows a perfect balance between the outside and the interior. Thus the body remains at the same temperature without rising or falling sudden. A real protection in winter against cold and during the hot temperatures it is forgotten...

INTEGRATED VENTILATION ZONES
Innovative technology, the ventilation stripes directly integrated into the compression provide optimal ventilation evacuating heat and perspiration.

SEAMLESS
For optimum comfort, the microfibre is 100% seamless, lightweight and very soft.

“The high-quality fibers provide a massaging and refreshing effect, while the Power Grip Climb feature offers you climbing support”

A millimetre-precision compression graduation in the targeted areas brings oxygen to the muscles and therefore enhances performances and facilitates recovery. The muscles are supported for a feeling of strength and a better performance on a longer distance. Ultra-extensible, the fiber is also more breathable for a maximum comfort.

ULTRA-PACKABLE
Practical, it can be folded easily to be stored in a backpack, a belt or a small pocket.

PICK POCKETS
Properly structured for better organization, they are easy to reach and have been designed to prevent any bouncing. They also prevent unnecessary twisting and help you conserve energy to stay focused on your stride.

HYDROPHOBIC
The water-repellent fibre wicks moisture away and evacuates sweat without absorbing it, even when excessive. No more uncomfortable heavy, damp clothing that irritates and doesn't dry.
