DAKINE 3-LAYER – TORAY® Lamination

ULTRA-PERFORMANCE SHELL FABRIC FOR SERIOUS CONDITIONS.

3-LAYER TORAY® MICRO OXFORD
Entrant DERMIZAX® EV by Toray® 20k Waterproof/ 20k Breathable Non-Porous Laminate and C6 Durable Water Repellant finish on the surface of the shell fabric.

This 3-Layer Toray® fabric offers lightweight, ultra-performance comfort by laminating a waterproof and breathable membrane to the inside of the shell fabric. This membrane acts as a climate-control system that lets perspiration out, while preventing moisture from penetrating inside. The third layer consists of a lightweight Tricot that is bonded directly to the laminate. This Tricot lining protects the laminate, provides a comfortable surface against the body, and accelerates the drying process by wicking away excess moisture.

The outside surface of the shell fabric is treated with a solvent-free Durable Water Repellant [DWR] finish that provides the initial barrier to rain and snow.

DAKINE 2-LAYER – TORAY® Lamination

LAMINATED HI-PERFORMANCE SHELL FABRICS COMBINED WITH INTEGRATED COMPONENT LINING SYSTEM TO COVER A FULL RANGE OF RIDING CONDITIONS.

2-LAYER TORAY® RIPSTOP (SOLID AND PRINTED)
2-LAYER TORAY® TEXTURED DOBBY
Toray® 15k Waterproof / 10k Breathable Laminate and C6 DWR finish on the surface of the shell fabric.

These 2-Layer Toray® fabrics offer hi-performance comfort by laminating a waterproof and breathable membrane to the inside of the fabrics. This membrane acts as a climate-control system that lets perspiration out, while preventing moisture from penetrating the interior. The outside surface of the shell fabric is treated with a solvent-free DWR that provides the initial barrier to rain and snow. To fine-tune overall warmth, comfort, and breathability, PrimaLoft ONE® insulation and the Dakine component lining systems are built into the jackets and pants.

DAKINE 2-LAYER – TORAY® Coating

COATED PERFORMANCE SHELL FABRICS WITH COMPONENT LINING SYSTEM FOR EVERYDAY RIDING CONDITIONS.

2-LAYER BRUSHED TWILL (SOLID AND PRINTED)
2-LAYER SHADOW STRIPE
2-LAYER MELANGE RIPSTOP
10K Waterproof / 10k Breathable Coating with DWR surface finish on the shell fabrics.

These 2-layer fabrics offer mid-weight performance comfort by using a waterproof and breathable coating on the inside of the fabric. This coating lets perspiration out, while preventing moisture from penetrating the interior. The outside surface of the shell fabric is treated with a DWR finish that acts as an initial barrier to rain and snow. The Dakine component lining systems and insulation are incorporated to fine-tune the overall warmth, comfort and breathability of the jackets and pants.

INSULATIONS

PRIMALOFT ONE®
PrimaLoft ONE® is an ultra-fine microfiber insulation designed to provide the highest level of combined warmth, water-resistance, softness and compressibility. It offers superior performance for cold-weather jackets and pants when combined with the Dakine 2-Layer Laminated shell fabrics and component lining systems.

DAKINE POLY MICROFILL
This lightweight, high-loft insulation is designed to provide excellent thermal protection from cold weather when combined with the Dakine 2-Layer Coated shell fabrics and component lining systems.

PREMIUM DOWN
This 90/10 Premium goose down, 550 fill-power insulation is used on the Men’s Drift and Women’s Kensington Jackets. This hi-level fill power will keep you warm in the coldest conditions. The jacket shell fabrics have super-lightweight and breathable polyurethane membranes with down-proof skrim pouches.
FABRICS

3L TORAY® MICRO OXFORD 100% NYLON
- C6 Solvent Free DWR surface finish for high-level water repellency
- 20K Waterproof / 20K Breathable Entrant DERMIZAX® EV Laminate
- Ultra-performance 3-Layer fabric designed to keep you dry and warm in the harshest conditions. Dakine’s top of the line Men’s fabric features the super durable Entrant DERMIZAX® EV laminate that provides maximum waterproofing and breathability.

2L TORAY® RIPSTOP 100% NYLON
- C6 Solvent Free DWR surface finish for high-level water repellency
- 15K Waterproof / 10K Breathable Laminate
- This high-denier, lightweight 2-Layer Ripstop is a durable weather-resistant fabric with a micro-check face and a soft hand. The laminating and finishing facilitate superior water repellency and breathability.

2L TORAY® TEXTURED DOBBY 100% NYLON
- C6 Solvent Free DWR surface finish for high-level water repellency
- 15K Waterproof / 10K Breathable Laminate
- This lightweight Dobby Weave gives texture to a Men’s and Women’s jacket or pant, adding dimension to the fabric. The finishing and laminating provide a high level of waterproofing and breathability.

2L SUPER FINE OXFORD 100% POLYESTER
- DWR surface finish
- 10K Waterproof / 10K Breathable Laminate
- The Super Fine Oxford lightweight shell fabric is used exclusively for our premium insulated jackets. The combined package is designed for maximum warmth in cold and dry conditions. This lightweight Oxford has a PU membrane providing outstanding breathability and a complete wind-block.

2L SHADOW PLAID 100% NYLON
- DWR surface finish
- 10K Waterproof / 10K Breathable Laminate
- Our stylish, subtle Shadow Plaid is created by a dispersed dye process and gives you another option to our solid jackets. The laminated backing provides a high level of waterproofing and breathability.

2L SUPER FINE PLAIN WEAVE 100% NYLON
- DWR surface finish
- 10K Waterproof / 10K Breathable Laminate
- Our Super Fine Plain Weave has a very soft hand with a subtle sheen. Super Fine Plain Weave is extremely durable and has a high performance rating of waterproofing and breathability.

2L HEATHER 100% POLYESTER
- DWR surface finish
- 10K Waterproof / 10K Breathable Laminate
- A Heather Fabric is the combination of different colored yarns, indicating a varicolored effect that is subtle, yet pleasing to the eye. This woven fabric gives the illusion of a textured look while actually having a smooth finish and a high rating of waterproofing and breathability.

2L BRUSHED TWILL (SOLID, EMBOSSED, AND PRINTED) 100% POLYESTER
- DWR surface finish
- 10K Waterproof / 10K Breathable Jet Micro Coated with Peach
- Our high performance 2-Layer Fine Twill poly microfiber features a brushed face for a soft hand. It’s backed with a jet micro coating to ensure excellent waterproofing and breathability.

2L MELANGE RIPSTOP 100% POLYESTER
- DWR surface finish
- PU Coat
- Our durable Ripstop Weave has a unique heather appearance. Down proofing allows maximum protection with a smooth appearance in a cold and dry climate.

2L SHADOW STRIPE 100% NYLON
- DWR surface finish
- 10K Waterproof / 10K Breathable Laminate
- The vertical Shadow Stripe offers a subtle texture to the fabric giving it dimension as light reflects off its surface in different directions. Its smooth jet micro coating ensures superior protection by providing waterproofing and breathability.

2L KNIT 100% POLYESTER
- DWR surface finish
- 10K Waterproof / 10K Breathable Laminate
- Our new, innovative knit fabric provides the fit, stretch and comfort you need for a mid-layer garment. Down proof with the mechanical stretch, it provides excellent athletic performance.

2L BONDED FLEECE KNIT 100% POLYESTER
- DWR surface finish
- 10K Waterproof / 10K Breathable Bonded Knit Laminate
- Our new, innovative knit fabric provides the fit, stretch and comfort you need for a mid-layer garment. Down proof with the mechanical stretch, it provides excellent athletic performance. Similar to our Coated Knit fabric, the bonded fleece provides extra warmth as a soft shell garment.

INSULATED

FLANNEL TWILL 100% POLYESTER
- Brushed + Sheared + DWR surface finish
- Acrylic 600mm Coated
- It may look like your traditional Flannel, but this fabric is specially treated to repel water, and lined with a quilted taffeta giving it a high level of weather protection. It’s a perfect option for a lightweight jacket.

AIRLIFT TWILL 100% POLYESTER
- DWR surface finish
- Bonded fleece backing
- Our soft shell fabric provides a hi-loft interior and excellent insulating properties without sacrificing breathability.
