

TECHNICAL FEATURES

ATHLETIC FIT THAT SUPPORTS THE PATTERN OF BODY MOVEMENTS.

- > promotes muscular coordination
- > strengthens the core muscles
- > increases balance and control

CLAW-LIKE GRIP ON MUD AND DIFFICULT GROUND THANKS TO THE HARDER COMPOUND LUGS.

- > unsurpassed grip
- > loss-free power delivery in sole pattern
- > stable foothold

3 DIFFERENT SOLE COMPOUNDS AND HARDNESS DEGREES FOR 3 DIFFERENT FUNCTIONS.

- > red area: harder compound, claw grip
- > black area: Medium hardness compound for durability and traction
- > grey area: softer for grip on wet and slippery rocks

SPECIFIC FOR ROCKY TERRAINS.

- > single compound sticky rubber TC1 Sole by Vibram®
- > wide lugs head for superior friction on smooth wet stones and durability
- > lower profile (3,5mm) thickness lugs provides stability and precision

PROTECTED LACING UPPER DESIGN.

- > sealed protection on the lacing
- > adjustable forward lacing
- > no rubbing, no pressure points – no blisters.

REDUCES IMPACT ON TOES AND FOREFOOT DURING FRONT COLLISION.

- > unique stability
- > protects the toenails

CONFORMS IMMEDIATELY TO MOUNTAIN TERRAIN FOR SECURE FOOTING.

- > precise and reliable hold
- > instinctive control of movement
- > partial power delivery
