

# GOGGLES

FIRST CLASS / EXCEL / CLASSIC /  
JUNIOR / OTG / NORDIC

Once again this year, Julbo plays the excellence card thanks to the REACTIV technology of Julbo photochromic lenses and cool new graphics, but we've also adapted our SuperFlow System to new models, extending our appeal to recreational skiers. A range you can count on.

# REACTIV PHOTOCHROMIC / 5 TECHNOLOGIES FOR UNIQUE ENJOYMENT

LIGHT  
**ZEBRA**  
PHOTOCHROMIC

1  
3

ALL WEATHERS, ALL CONDITIONS

- > Photochromic (category 1 to 3)
- > Yellow tint: increased light receptivity

NTS  
Non Temperature Sensitive

LIGHT RED  
**ZEBRA**  
PHOTOCHROMIC

1  
3

HIGH CONTRAST - ALL DAY LONG

- > Photochromic (category 1 to 3)
- > Red tint: accentuates relief

NTS

BLUE FLASH

# 0% FOGGING 100% VENTILATION

## SUPERFLOW SYSTEM THE ONLY EFFECTIVE ANTI-FOGGING SYSTEM!

In the cable car, on a café terrace or when climbing uphill: over a day's skiing, there are times when you really need a bit of extra ventilation. Thanks to the SuperFlow System, you can say goodbye to fogging: the goggles breathe and the skier with them! The secret? An ultra-venting system created by a lens that can be easily moved forward away from the frame. So you'll never need to take off your goggles to «breathe» and everyone stays perfectly protected from the effects of the sun.

VENTILATION / REGULATION / ANTI-FOG / PROTECTION

### TECHNOLOGY ADAPTED TO NEW MODELS.

This season, Julbo is expanding its product offering and adding the SuperFlow System to new models. From freeriders to recreational skiers, everyone will be able to ski with 100% ventilation and 0% condensation!

**SUPERFLOW SYSTEM TECHNOLOGY IS NOW AVAILABLE ON THE MODELS  
AEROSPACE, STARWIND, AIRFLUX ET VENTILATE**

ATTENTION TO DETAIL AND PERFORMANCE

## GOGGLES

## FRAME

**SUPERFLOW SYSTEM**

Thanks to the SuperFlow System, the screen can be adjusted – even while wearing gloves – and edged forward to better manage heat and avoid any fogging when climbing.

**MINIMALIST FRAME**

An extra-wide field of vision from every angle. The skier's view is completely clear both laterally and vertically.

**ANATOMIC FRAME**

Cuts on the frame for more flexibility.

**AIR FLOW**

Venting incorporated into the frame for good air circulation to prevent formation of fogging.

**MINI-CAP**

A special chassis shape that protects the spherical lens and stops it being scratched when kids are less than careful with their goggles.

**PROTECTIVE PEAK**

Peak providing protection from the snow when the SuperFlow System is in the open position.

## LENS

## SPHERICAL DOUBLE LENS

## CYLINDRICAL DOUBLE LENS

## CYLINDRICAL SINGLE LENS

## INTERCHANGEABLE LENS

## VENTILATED LENS

Additional ventilation via the lens to prevent any fogging.

## ANTI-FOG COATING

The inner surface of the lens has an additional anti-fog coating.

## OPTICAL CLIP

The clip can be fitted with your prescription by an optician, but is also interchangeable.

## GLARE CONTROL

An anti-glare polarizing filter (57% polarization) to combat glare while remaining sufficiently light to allow good visibility. This makes the terrain easy to read in both good and bad weather.

## FOAM

## DUAL SOFT FOAM

Two layers of foam for optimum comfort and shock absorption.

## COSY SOFT FOAM

Single density foam for comfort and optimum ventilation.

## SOFT FOAM

Single density foam.

## OTG (OVER THE GLASSES) FOAM

Thermoformed double density foam contour adapting perfectly to prescription glasses.

## ATTACHMENT

## EXTENDED OUTRIGGER

15 mm extension on each side of the goggle for compatibility with all helmets and an even grip on the face.

## AXIS STRAP SYSTEM

Pivoting joint on strap for improved helmet compatibility.

## OVERSTRAP

Offset strap for compatibility with all types of helmet.

## ARTICULATED HEADBAND CLIP

Flexible adaptation for helmet wearers.

## STRAP

## FULL SILICONE STRAP

Strap lined with a silicone strip for perfect grip.

## SYMMETRICAL ADJUSTMENT

Two loops either side of the strap for symmetrical adjustment in the blink of an eye.

## EASY CLIP

Additional buckle on the back of the strap for easier clipping and unclipping of your goggles.

GOGGLES

# FIRST CLASS

First Class is quite simply the best of Julbo technologies. A high-performance range for the most demanding skiers.

*Fam Cham*

FAMILY SERIES

## PRIDE OF PLACE FOR OUR CHAMONIX RIDERS!

As is the case each year, with the Family Series, Julbo creates a unique pro model in collaboration with its team. This season, pride of place goes to Chamonix through the creativity of five of its native sons: Vivian Bruchez, Douds Charlet, Sam Favret, Léo Slemett and Pica Herry. Using an Aerospace base (SnowTiger photochromic lens and Glare Control, SuperFlow System, Minimalist Frame), they've given us Fam Cham, packed with references to the Chamonix spirit. A collector's item!

GOGGLES

# EXCEL

This benchmark range guarantees extreme protection and total comfort for big, fun days out.

GOGGLES

# CLASSIC

A modern, high-performance  
and affordable general  
public range.

GOGGLES

## OTG

Comfortable solutions for all glasses wearers whether children or adults, or big or small faces.

## OTG

100% DESIGNED FOR PRESCRIPTION GLASSES

The foam is cut away to create room for all sizes of temple, with generous interior space and a wide field of vision: Everything is designed for prescription eyewear.

## OPTICAL CLIP

SUITABLE FOR ALL OUR GOGGLES

For those who prefer to ski without glasses or contact lenses, our optical clip can be adapted to your prescription by an optician. Interchangeable, it can be easily used on all of our goggles.
