ALPIN					
New Design	RX	A race-inspired sidecut and nimble handling give the RX12 even more rebound on the groomers for explosive tight turns (SL) and long big-radius turns (GS). With precise edge grip and next-level stability, this ski is built for fun.	RX12 SL	Piste	explosive short-radius turns precise edge grip race-inspired sidecut The RX12 SL has a race-inspired sidecut for nimble handling. The proven sandwich-sidewall construction, combined with Hollowtech 2.0 provides more dampness and better grip through short, fast turns. With precise edge grip and explosive short turns, the RX12 SL is ideal for the piste purists out there. This is the go-to choice for skiers looking for a high-performance and lively on-piste ski with a short turning radius.
			RX12 GS		The RX12 GS has a race-inspired sidecut for nimble handling. The proven sandwich-sidewall construction, combined with Hollowtech 2.0 provides more dampness and better grip at high speeds. The RX12 GS is ideal for the piste puritsts out there with its precise edge grip for long, carving turns.The RX12 GS has a race-inspired sidecut for nimble handling. The proven sandwich-sidewall construction, combined with Hollowtech 2.0 provides more dampness and better grip at high speeds. The RX12 GS is ideal for the piste purists out there with its precise edge grip for big, long, carving turns.
New Concept	PX	The versatile PX piste models are designed for advanced skiers looking for a lively yet balanced carving ski with outstanding edge grip .	PX71	Piste	versatile carving ski dynamically balanced on-piste performance The versatile PX71 delivers lively and playful fun on the groomers. The carbon reinforced sandwich-sidewall construction with Hollowtech 3.0 and premium wood core guarantees superior dampness and edge grip, even at high speeds. This is a carving ski for advanced skiers: When it comes to lively yet balanced piste performance, it's hard to beat.
New Design	DX	The new DX models are dynamic yet smooth . These all-mountain piste models are forgiving without compromising on Kästle's usual high standards of performance.	DX73	All Mountain Piste	The DX73 is a piste-focused ski with sandwich-sidewall construction. It combines energetic performance with forgiving handling like no other ski in the Kästle stable. This is the perfect ski for skiers who like to keep things simple and easy-going — for effortless control and effortless carving.
			DX85		The DX85 with sandwich-sidewall construction is an all-mountain ski. It offers a solid ride and combines energetic performance with forgiving handling, like no other ski in the Kästle stable. The perfect ski for skiers who enjoy effortless and consistent skiing in all conditions.
New Design	DX (w) FX (w)	The Vogue line is specially designed for women, with lightweight piste, all-mountain and freeride models that churn out fun performance on any terrain. The flex and binding mount points are optimised for women and guarantee easy handling and solid dependability, whatever the mountain throws at you.	DX73 (w)	VOGUE LINE	The DX73 (w) from the Vogue women's line brings together all the benefits of a Kästle piste ski but tailored to female riders: It is lighter, more responsive and the binding mount points are women specific. Women skiers will love the effortless on-piste handling and bomber dependability of this ski.
			DX85 (w)		The DX85 (w) from the Vogue women's line brings together all the benefits of a Kästle all-mountain ski but tailored to female riders: It is lighter, more responsive and the binding mount points are women specific. Women skiers will love the effortless front and backside handling of this ski and its bomber dependability.
			FX96 (w)		The FX96 (w) from the Vogue women's line with TRI technology and Hollowtech 3.0 brings together all the benefits of a Kästle freeride ski, but tailored to female riders: It is lighter, more responsive and the binding mount points are women specific. Women skiers will love the transfer of power in the backcountry that makes this ski easy to handle and super dependable.
No Changes	MX	The MX line has been KÄSTLE's top-selling, legendary line of skis for over 10 years. These powerful skis excel in terms of stability and edge grip and are built as a classic sandwich-sidewall ski for all-mountain performance.	MX67	All Mountain Piste	lively piste ski stability and edge grip the benchmark for all-mountain performance With a new, innovative sidecut, Hollowtech 2.0 and race-inspired sandwich construction, the MX67 is the most agile on-piste ski within the KÄSTLE MX line. This is a piste-focused all-mountain ski, with unbeatable dampness and precision.
			MX74		powerful piste ski stability and edge grip the benchmark for all-mountain performance With a new, innovative sidecut, Hollowtech 2.0 and race-inspired sandwich construction, the MX74 is the most powerful all-mountain ski in the KÄSTLE MX line. This is a versatile frontside ski that doesn't shy away from the sidecountry and always delivers supreme dampness and precision.
			MX84		versatile powerful stability and edge grip the benchmark for all-mountain performance With a new, innovative sidecut, Hollowtech 2.0 and a race-inspired sandwich construction, the MX84 is the coveted classic within KÄSTLE's all-mountain line. This is a versatile frontside ski, with a proven track record of tackling demanding backcountry terrain with the utmost precision.
			MX89		hard-charging powerful stability and edge grip the benchmark for all-mountain performance With a new innovative sidecut, Hollowtech 2.0 and a race-inspired sandwich construction, the MX89 is the ideal all-mountain, all-condition ski. This all-rounder is at home on hardpack and in mixed terrain and pumps out maximum performance and stability.
			MX99		front and backcountry stability and edge grip the benchmark for all-mountain performance With a new, innovative sidecut, EARLY RISE technology, Hollowtech 2.0 and a race-inspired sandwich construction with carbon layers, the MX99 is the all-mountain ski that excels off-piste. From piste to powder, this all-rounder pumps out maximum performance and stability.
	FX	The FX models are built for the ultimate freeride experience. The 3D shape, triple wood core and carbon-fibreglass wrapped core of the lightweight TRI technology results in maximum transfer of power, stability and perfect float. Paired with Hollowtech 3.0 these skis raise the bar in terms of minimised weight and maximised downhill performance.	FX86	Freeride	versatile all-terrain performance at minimal weight the new benchmark for innovation The FX86 is a true all-rounder. The 3D shape, triple wood core and carbon-fibreglass wrapped core of the lightweight TRI technology results in maximum transfer of power, stability and perfect float. Combined with Hollowtech 3.0, this ski raises the bar in terms of minimised weight and maximised downhill performance.
			FX96 HP		unprecedented all-terrain freeride performance at minimal weight the new benchmark for innovation HP - carbon-fibreglass sleeve The HP in the name stands for high performance. And the FX96 HP certainly lives up to its name, whether it's challenging backcountry or big fat turns on corduroy. For a one-ski quiver, this ski is hard to beat.
			FX106 HP		unprecedented freeride performance at minimal weight the new benchmark for innovation HP - carbon-fibreglass sleeve The FX106 HP is made for the backcountry and when teamed up with the FREETOURL 12 2.0 binding is also designed to be used as a touring ski. The 3D shape, triple wood core and carbon-fibreglass wrapped core of the lightweight TRI technology results in maximum transfer of power, stability and perfect float. Combined with Hollowtech 3.0 this ski raises the bar in terms of minimised weight and maximised downhill performance. With the FX106 HP, epic lines and big drops are a breeze for Freeride World Tour Champion Lorraine Huber. This HP (high performance) ski is the weapon of choice for pros like Lorraine, from the first lift right through to the last ride of the day.
			FX116		ultimate float at minimal weight the new benchmark for innovation The FX116 is built for pow! The 3D shape, triple wood core and carbon-fibreglass wrapped core of the lightweight TRI technology results in maximum transfer of power, stability and perfect float. Combined with Hollowtech 3.0 this ski raises the bar in terms of minimised weight and maximised downhill performance. With the FX116, epic lines and big drops are a breeze for pro rider Griffin Post. These are the weapon of choice for riders like Griffin, from the first heli drop right through to the last line of the day.

No Changes	TX	The TX models are some of the lightest touring skis on the market. Freeride-inspired sidecuts are teamed with an ultra-light and stable carbon construction. These lightweight touring skis with unbeatable downhill performance enhance the touring experience with smooth, relaxed ascents and playful descents.	TX65 HP	Tour	designed for the SkiMo World Cup lightweight with unrivalled downhill performance HP – two carbon sheets for maximum stability	<p>The innovative carbon construction with FAST GRIP SHOVEL and Hollowtech 2.0 makes the TX65 HP a real race ski, with downhill performance that’s unbeatable. And it weighs in at just 690 g.*</p> <p>This is a lightweight ski for fast ascents without any compromise on stability or downhill performance. A ski designed for the Ski Mountaineering World Cup.</p> <p>*Slight variations in weight may occur</p>
			TX82		lively and stable lightweight with unrivalled downhill performance	<p>The innovative carbon construction with EARLY RISE technology and Hollowtech 2.0 make the TX82 the liveliest touring ski in the KÄSTLE line, with unbeatable downhill performance at minimal weight.</p> <p>This is a lightweight ski for relaxed ascents and a lively, high-performance downhill experience. Ideal for changeable conditions – throughout the day or throughout the entire ski season.</p>
			TX90		the full touring experience lightweight with unrivalled downhill performance	<p>The innovative carbon construction with DUAL RISE technology and Hollowtech 2.0 result in relaxed ascents and playful descents. The TX90's unbeatable downhill performance with minimal weight makes it the most versatile touring ski in the KÄSTLE line.</p> <p>The perfect all-rounder for backcountry skiers who enjoy the ascent just as much as the descent. The build and the medium-width design are perfectly pitched to make your touring day a truly unforgettable experience – from the ascent through to the gnarly terrain on the way down.</p>
			TX98		relaxed ascents and playful descents lightweight with unrivalled downhill performance	<p>The innovative carbon construction with DUAL RISE technology and Hollowtech 2.0 ensure playful descents in powder. The TX98 has unbeatable downhill performance in an optimized lightweight build.</p> <p>This ski is ideal for ambitious backcountry skiers focused on discovering untracked powder. Ascents are virtually effortless due to the pared-down weight and the float on the downhill will have you grinning all day long.</p>
New Concept	KX	<p>The KX line is for the world champions of tomorrow, with zero compromise on Kästle quality.</p> <p>Our little mascot “Holly” makes their first experience fun from the get-go.</p>	KX66	Kids	high-quality children's ski with "Holly" design for the chargers of tomorrow	<p>Fun and premium quality – wrapped in one child-friendly package. The KX66, built around a natural wood core with Hollowtech 2.0 and a robust base, is a full-blown Kästle ski for children.</p> <p>Our little mascot “Holly’s” ears make their first turns fun, right from the start, so they’ll be keen to keep practising. Holly’s ears are intuitively held parallel and also help them come to a stop more easily.</p>
New Concept	JX	Kästle’s top-quality junior skis are for ambitious kids who like to rip on the piste, in the backcountry or through the gates. When they’re having fun, they’re learning without even realising.	JX67	Junior	high-quality junior ski athletic and responsive for the chargers of tomorrow	Fun and premium quality wrapped in one. The JX67, built around a natural wood core with Hollowtech 2.0 and a robust base, is a full-blown Kästle ski for youngsters.
			JX68		high-quality junior carving ski high-performance sandwich construction for the chargers of tomorrow	<p>The JX67 has more advanced junior skiers rocking the groomers and acing the kickers in no time.</p> <p>The JX68, built around a top-quality wood core with proven sandwich-sidewall construction and Hollowtech 2.0 is a full-blown Kästle ski for little racers – or soon-to-be racers.</p> <p>This ski is designed for younger skiers who are already proficient and want a more lively ski with precision edge grip for carving. It is stable through fast turns and will see them quickly up their game through the race gates.</p>
	iD4			Individual	4-dimension tailoring: terrain preference, skiing ability, body measurement and design style	<p>The individual tailoring approach of the iD4 ski concept, available from select premium Kästle retailers, is based on four specific factors: terrain preference, skiing ability, body measurements and design style.</p> <p>Our special ski fitting terminal uses an App to gather the client’s data and our Kästle algorithm then applies 90 years of ski manufacturing knowledge to calculate the optimal ski for that person’s needs. The iD4, including the client’s preferred design and signature option, is then ready to collect from the premium Kästle retailer in just 5 working days.</p> <p>*Only available in the Alpine region</p>
New Design	Limited	<p>90 years of ski manufacturing knowledge is ploughed into these unique, limited edition models. Making these lightweight premium carving skis involves lovingly assembling 30 individual elements by hand in our Hohenems factory.</p> <p>We’ve named them SCALA, PROTO and SUPRA – after Kästle models of yesteryear.</p> <p>A patented steel rim runs around the top circumference to protect the aluminium topsheet of these one-of-a-kind skis.</p>	SCALA	Piste	elegant piste carving ski lively and light	<p>The SCALA is a forgiving piste ski for playful, carving turns. The steel rim that runs round the ski's top circumference protects the elaborate carbon construction and the exquisite wood/carbon surface and adds stability.</p> <p>These are on-piste carving skis for the discerning skier looking for a unique, limited edition ski, with all the Kästle performance you've come to expect at high speeds.</p>
			PROTO	Allmountain	elegant all-mountain carver lively and light	<p>The PROTO is a forgiving, all-mountain ski for the piste and beyond. The steel rim that runs round the ski's top circumference protects the elaborate carbon construction and the exquisite wood/carbon surface and adds stability.</p> <p>This ski is made for the discerning skier, looking for a unique, limited edition all-mountain ski. A balanced flex profile makes this ski supple and smooth off-piste and stable on the groomers.</p>
			SUPRA	Backcountry	good backcountry float playful descents relaxed ascents	<p>The SUPRA's EARLY RISE construction makes it perfectly suited to the backcountry. The steel rim that runs round the ski's top circumference protects the lightweight wood construction and the exquisite carbon surface and adds stability.</p> <p>Made for the discerning skier looking for a unique, limited edition ski to take beyond the resort that excels at playful descents and relaxed ascents.</p>

New Line	RX	The lightweight RX models represent Kästle’s comeback onto the cross-country scene making World Cup performance accessible to everyone. We are the first to bring real competition skis into series production, offering performance that’s unbeatable.	RX10	RACE	developed for World Cup athletes high-performance hand grind stable, yet extremely lightweight unrivalled glide and tracking	<p>With the RX10, we are taking real competition skis into series production for the first time ever. A carbon-reinforced honeycomb core and Hollowtech 2.0 technology result in perfectly balanced skis. Precise camber tensioning, combined with a hand finish, guarantee highly efficient forward movement and unbeatable glide performance.</p> <p>Unbeatable performance, maximum transfer of power and precision for World Cup athletes and keen cross-country skiers looking for speed.</p>
			RX10 JR		developed for World Cup athletes high-performance hand grind stable, yet extremely lightweight unrivalled glide and tracking	<p>With the RX10 JUNIOR, we are bringing World Cup performance into the junior sector. A carbon-reinforced honeycomb core and Hollowtech 2.0 technology result in perfectly balanced skis. Precise camber tensioning, combined with a hand finish, guarantee highly efficient forward movement and unbeatable glide performance.</p> <p>Unbeatable performance, maximum transfer of power and precision for club squads and keen youngsters looking for speed.</p> <p>Classic addition: The skin version with 100% mohair skin in the kick zone ensures good grip even on hardpacked, smooth snow, yet lends the ski smoother and more silent glide performance than any other fish scale cross-country ski.</p> <p>With the RX10 CLASSIC JUNIOR SKIN there is no need for previous experience with wax, making it the ideal choice for easy handling in all conditions.</p>
			XP20	PERFORMANCE	lightweight long-distance ski precise control with optimum power transmission narrow sidecut for optimised glide	<p>The narrow XP20 is very lightweight and offers excellent transfer of power. The carbon-reinforced honeycomb construction and Hollowtech 2.0 create a perfectly balanced ski.</p> <p>The XP20 really excels at high speed and over long distances. It is robust, offers precise control and the glide performance will suit more energetic skiers.</p> <p>Classic addition: The skin version with 100% mohair skin in the kick zone ensures good grip even on hardpacked, smooth snow, yet lends the ski smoother and more silent glide performance than any other fish scale cross-country ski.</p> <p>For the XP20 CLASSIC SKIN version, there is no need for previous experience with wax, making it the ideal choice for easy handling in all conditions.</p>

XP

The models in the XP line stand for high performance and optimised glide. Carbon-reinforced construction and unparalleled Kästle quality result in outstanding performance at minimal weight and maximum versatility.

XP30

SPORT

versatile | wider sidecut for more comfort | carbon reinforced | sintered graphite base for faster glide

The versatile XP30 is slightly wider for more comfort when skiing or training. The carbon-reinforced wood construction in lightweight paulownia, and the Hollowtech 2.0 technology for reduced weight result in a perfectly balanced ski.

The sintered graphite base makes it robust and lends it good glide performance.

Classic addition:
The skin version with mohair-blend skin in the kick zone ensures good grip even on hardpacked, smooth snow, yet lends the ski smoother and more silent glide performance than any other fish scale cross-country ski.

For the XP30 CLASSIC SKIN version, there is no need for previous experience with wax, making it the ideal choice for easy handling in all conditions.

XP30 JR

versatile | wider sidecut for more comfort | carbon reinforced | sintered graphite base for faster glide

The versatile XP30 JUNIOR is slightly wider for more comfort when skiing or training. The carbon-reinforced wood construction in lightweight paulownia combined with the Hollowtech 2.0 technology for reduced weight results in a perfectly balanced ski.

The sintered graphite base makes it robust and lends it good glide performance for younger skiers.

Classic addition:
The skin version with mohair-blend skin in the kick zone ensures good grip even on hardpacked, smooth snow, yet lends the ski smoother and more silent glide performance than any other fish scale cross-country ski.

For the XP30 CLASSIC JUNIOR SKIN version, there is no need for previous experience with wax, making it the ideal choice for easy handling in all conditions.
