

Art. 88N 999999 - SPITFIRE 2.1

Spitfire 2.1 is an agile and quick ski boot designed for use on evolved Grand Tour. It was created with the aim of providing, a lightweight, high-performance ski boot, an ideal crossover between the world of touring and the world of racing and it is the first ski boot on the market to offer **dual compatibility with both Trab TR2 safety bindings and Tech mini bindings.** The Grilamid® shell and “**CRP Cuff™**” in **polyamide reinforced with carbon fiber**, allows to reduce weight while maintaining a strong yet flexible structure . The **SPEEDfire Closure System™** allows you to switch from ski mode to walk mode with one quick motion, just like on competition ski boots. The **Ergal** lever quickly activates the rear locking/unlocking device to which it is anchored by means of a Dyneema lanyard. The patent **Pegasus Buckle™** placed on the hinge is equipped with “**Backbone Control**” micro-adjustments and a functional design to contain volumes. The range of motion is exceptionally wide thanks to the **EZ Flex™** hinge on the **Grilamid®** tongue. The thermo-mouldable, comfortable liner provides an insulating barrier. A combination of La Sportiva technologies for the most demanding ski-tourers.

SHELL AND CUFF:

1. **G-Shell™**: the most compact shell on the market (just 297mm in length, size 27,5) it is made in super light Grilamid® to reduce width and weight of the ski boot without compromising the solid structure. Snug fitting and high performing this ski boot offers exceptional resistance to low temperatures and a perfect flex.
2. **CRP Cuff™**: Polyamide cuff/nylon PA12 carbon loaded: makes the overall boot much lighter and high performing. The exceptional forward lean of 68°, allows for maximum mobility in order to move quickly and safely in all situations. The removable spoiler allows for further personalization of the forward lean.
3. **EZ Flex™ Tongue**: A Grilamid® tongue with a folding joint between the top and bottom, a concept deriving from La Sportiva hiking boots. It allows freedom of movement for the ankle both on steep slopes and more gentle ground. There is a protective snow guard gaiter positioned under the tongue.
4. **2BT Tech Last™**: the anatomic last offers perfect fit and comfort.
5. **2BT Tech Heel™**: optimization of volumes on the heel for a precise and comfortable fit.
6. **Additional Spoiler** available in the mounting kit supplied, can be regulated in two different positions.
7. **WarmSole™ Insert**: insulating polyurethane, removable sole. This insert avoids direct contact of the foot with the shell, allowing for greater comfort and perfect thermal insulation. Warmsole™ makes La Sportiva 2 hook models the best on the market

CLOSURE SYSTEM

8. **SPEEDfire Closure System™**: fast locking system and cuff adjustment for immediate transition from ski to walk model with one quick motion.
It comprises:
 - Quick coupling, lock/release system on the rear cuff with a spacer to keep the axis of the lever in check while skiing.

- **Ergal Closure Lever** that controls the locking/release system and allows you to switch quickly switch from ski mode to walk mode.
 - **Adjustment plate** applied to the cuff: 3 position regulation (12°, 14°, 16°).
 - Rear positioning holes for additional Velcro **“Power Strap”**
9. **Pegasus Buckle™ (patented)**: aluminium buckle with “Backbone Control”, micro regulation designed for easy opening/closing operations that works in combination with the wide opening **EZ Tour™ Lever** .

OUTSOLE AND BINDING COMPATIBILITY

10.LazerGrip Outsole™: insulating, dual density outsole with soft rubber inserts (75 shore) at the toe and heel for maximum grip when climbing. The special coating provides enhanced hold and protection when used on a rock surface. The front section of the outsole has a spacer for easy centering of the ski boot. The outsole complies to ISMF regulations.

11. Exclusive dual compatibility with both the TRAB TR2 safety binding and Tech mini binding.

Liner:

- 12. Thermo mouldable Paulau®
- 13. Highly insulating lining
- 14. Patented lacing system which can be personalized , deriving from La Sportiva’s high altitude mountain boots.
- 15. Patented EZ Flex™ that allows for total freedom of movement of the ankle.
- 16. Ankle reinforcement for added comfort.

Tech Info:

Colour: black

Shell: Grilamid®

Cuff: Carbon Reinforced Polymer (CRP) + Grilamid® (stretch model: 5300 Mpa)

Cuff mobility: 68°

Closure system: **SPEEDfire Closure System** (cuff/upper level) + **Pegasus Buckle** (lower lever) **with micro regulation “Backbone Control”**

Closing levers: 2 + additional power strap additional straps

Forward Lean: 3 positions (12°, 14°, 16°)

Compatible bindings: TRAB safety bindings and tech mini bindings

School: La Sportiva LazerGrip™

Weight (1/2 pair, size 27): 1160 gr

sizes: da 24 to 31 ½ (mondo point)

LOGOS: TR2 SKITRAB, MADE IN ITALY, IDEAL USE CLOSE TO TOUR ABOVE RACE (a little lower than Sytron)
