

LIQUIDSKIN

The most important innovation since the introduction of silicone masks. LiquidSkin the Bi-silicone exclusive technology. Two different types of silicone: a firmer portion for support structure and a softer portion for contact with your face. 45% softer on skin of unparalleled comfort. 270% greater elasticity for a perfect fit.

BI-LENS

Due to their construction bi-lens masks usually provide less internal volume. They guarantee great performance and durability. Ideal for divers that are looking for the possibility to install corrective lenses.

ERGO BUCKLES

Mares uses the most innovative buckle design in the World. These buckles make adjusting the split strap fast and intuitive. Sturdy yet compact, they are designed specifically to optimize the advantage of Mares skirt mounted buckles.

TRICOMFORT

Tricomfort technology is a softer material overmolded on the frame in the area of the forehead and nose. This soft material provides superior comfort during frequent or long dives.

LOW INTERNAL VOLUME

Masks with less internal volume are more compact to store in the jacket pocket. The distance between lenses and the eyes is less and the result is a wider field of vision. For the apneist, less volume makes easier compensation.

MONOLENS

The ideal choice for who want to have an open field of vision. The right approach for those who wants a panoramic view of the oceans.

OPTIONAL OPTICAL LENSES

Mares offers corrective lenses for most models. In addition to the negative corrective lenses (-1 to -7), some models also have positive (+1,5 to +3). Mares design makes it quick and easy to install lenses.

BUCKLES ON SKIRT

By attaching the buckles to the skirt masks have superior hydrodynamics because the strap fits closer to the head. In addition the tension exerted by the strap acts on the skirt and not directly on the frame reducing the pressure of the frame against the face.

WIDE FIELD OF VISION

Mares R&D and Design divisions have conducted numerous computer simulation and complex studies on the faces shape. The results are masks which combine great comfort with an incredible field of vision.

MID SIZE

Mares has dedicated its effort to create a line of masks in Mid size. Adults with narrow faces and young divers may find this an ideal choice. Those divers will discover the pleasure of a perfect fit within Mares technologies.
