

DOUBLE UP

Double the paddle power!

Imagine taking your favourite longboard, and squeezing all that stability and ease-of-use into a mid-length surfboard. The volume would remain, giving you lots of flotation and paddle power. And just imagine your balance!

- Rail :** Full
- Bottom :** Beginner to Intermediate
- Ideal waves :** 1-6ft
- Level :** Beginner – Expert

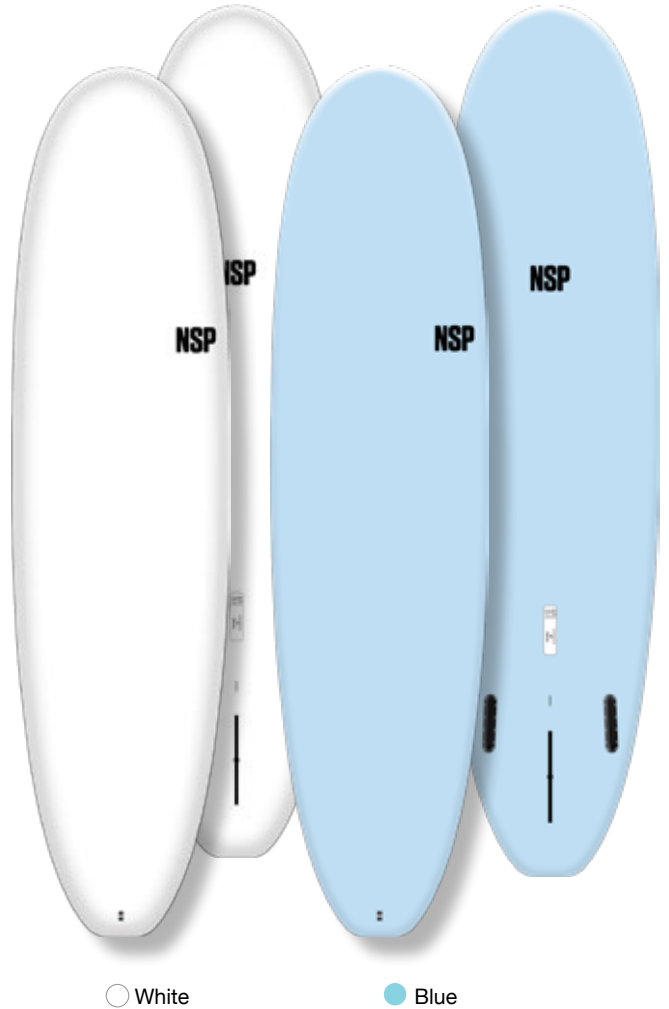

This is what the Double Up is all about. NSP created a shape aimed at beginners and intermediates looking to progress beyond the board they learned on and retain that sweet flotation and paddling power. The Double up is also a great performance board for larger boned riders.

An elegant rocker with a mild lift on nose and tail translates to solid paddling power and wave-catching prowess. Advanced riders will enjoy the swift directional changes thanks to a double-rolled concave at the back portion of the board.

The Double Up is constructed using NSP's high-performance Protech technology, combining a high precision 36g molded SecureCell EPS core with custom wet lamination. 6oz + 6oz glass deck and 6oz glass bottom + extra 6oz around the fins, then laminated with UV stable resin, making the Double Up a lightweight, durable, and visually appealing board that will take your surfing to the next level.

The new tint lamination process provides each board with it's own unique, artsy and custom-like finish.

Available with NSP's new FTU side fin boxes (compatible with Futures® Fins) and a Surf 10 center fin box. New MFC designed nylon side fins and 8" center fin included.

SPECIAL FEATURES

Rounded square tail

Surf 10 + 2 x FTU boxes

Nylon fin 8"

2 x MFC designed FTU fins
