

A Soulful longboard for the rider seeking classic style and that endless glide. This is a great board for retailers looking for a longboard in a stand-out construction. The CocoFlax construction and its look are visual selling features for a market that is becoming more and more eco-conscious.

Rail : Medium
Bottom : Concave into flat
Ideal waves : 1-6ft
Level : Beginner - Expert

- The Endless represents a classic era of surfing and is designed for pure longboarders looking for endless glide and soulful expression of their riding.
- Neutral egg-shaped rails with no edges at the tail provoke enough drag to allow noserides, hang tens and other classic moves.
- The Endless models feature a proven design using "V" under the rider's trim area, giving effortless rail-to-rail transitions and drop knee cutties.
- The bottom shape combined with the signature tucked edge rail design, delivers a better response while providing a controlled and stylish performance in small to overhead-sized waves.

A square tail releases quick, allowing for speed and uninhibited glide, aided by the parallel outline of the rails.

Fins:
 The CocoFlax Endless is available with either FCS II side fin box set-up or NSP's new FTU fin boxes (compatible with Futures® fins) and Surf 10 center fin box.

The NSP Endless is a Kym Thompson shape.
