

ACTIVE COOLING

Don't let the heat keep you in the shade. In 2018, Odlo shows you how to fully enjoy a season of 'Active Cooling', whether you are with friends or alone, as long as you are on the move. The brand, founded in Norway and engineered in Switzerland, is ready to conquer summer by launching Ceramiwool, based on its Ceramicool technology.

Applying its expertise and "making sure that it stays one step ahead", Odlo has designed items for outdoor activities, combining merino/Tencel fabrics with Ceramicool inserts. Building on the success of Ceramicool, Odlo has further expanded this innovative technology in all its product categories. In addition to sports underwear, Ceramicool has been included in the running range – with the Zeroweight line – as well as in training, cycling, outdoor performance and some accessories.

However, Odlo does not forget its fundamentals. The brand has reworked its Cubic sports underwear line, which has been renamed F-Dry, "the driest Odlo ever made". Much to the satisfaction of retailers, the first range of polo-shirts has also been put forward.

More importantly, with 'Active Cooling', the entire Odlo collection follows the same guidelines and conveys a clear message: it ensures that sport enthusiasts find peace of mind and moments of introspection, while being cooler with friends or with anybody they might meet on a hiking trail or on their favorite running path.

**ENGINEERS
OF
ACTIVE
LAYERS
SINCE
1946.**

LAYER 1 MOISTURE MANAGEMENT BASE LAYER

The first layer, in direct contact with the skin, regulates your body temperature and keeps you dry using modern functional fibers and innovative fabric structures.

Pick a layer that's fitted and close to your body just like a second skin.

LAYER 2 INSULATION MID LAYER

This layer is meant to retain heat if needed. There are natural and synthetic insulation materials which both allow you to stay at a comfortable temperature level.

Here it's ideal to select a warm but light layer to trap the heat.

LAYER 3 WEATHER PROTECTION OUTER LAYER

The outer layer is there to protect you from the elements. You will usually get a balance of rain resistance, wind resistance, and breathability.

Choose a layer that offers the right weather protection and allows freedom of movement.

FROM HEAD TO TOE

Don't forget to protect your extremities from the temperature changes with appropriate accessories such as gloves, headwear and socks according to your activity! You don't want to overheat so choose smartly.

What to wear and how-to choose your layers before heading for the outdoors can be confusing so we are here to help.

KNOWING THE PRINCIPLE OF LAYERING :

Each layer has a function, so instead of being restricted by the elements, you can easily adapt to the environment by adding or subtracting layers as needed.

The base layer (against your skin) manages moisture; the Midlayer or insulating layer protects you from the cold; the Outer Layer or shell shields you from wind and rain.

As the inventor of the **three-layer principle** and the unique sports underwear, Odlo has become the market leader and pioneer in functional sportswear and offers a wide range of technologies that ensure the perfect body climate.,

For a better understanding of how-to layer up for sports read on:

PROS AND CONS OF DIFFERENT MATERIALS			
SYNTHETICS	Fast drying, good moisture management, feels lighter than other materials, can be recycled, inexpensive	+	No natural odour prevention
WOOL	Natural, good insulation, good moisture management, no unpleasant odor	+	Not as fast drying as synthetics, feels heavier than other materials
DOWN	Natural and efficient warmth, light, compact	+	More expensive, slow drying
COTTONS	Inexpensive, versatile	+	Poor insulation, poor moisture management

LABELS

PRODUCT CLASSIFICATION

GOOD

Fundamental piece that offers a solution to your most central needs.

BETTER

Pinnacle inspired piece that shares Key technologies and features with more details.

BEST

Pinnacle piece that combines innovation and knowhow made to inspire and lead the trend.

TEMPERATURE CONTROL SYSTEM (TCS)

X-LIGHT

X-LIGHT

Keeps the body cool and dry. Breathable, extremely lightweight sportswear for warm temperatures and intense activities. The underwear x-light is defined by high-moisture transport and quick drying properties.

LIGHT

LIGHT

Light provides optimum comfort in all situations and in all weather conditions throughout the entire year. High elasticity and fast drying distinguish Odlo's light underwear.

WARM

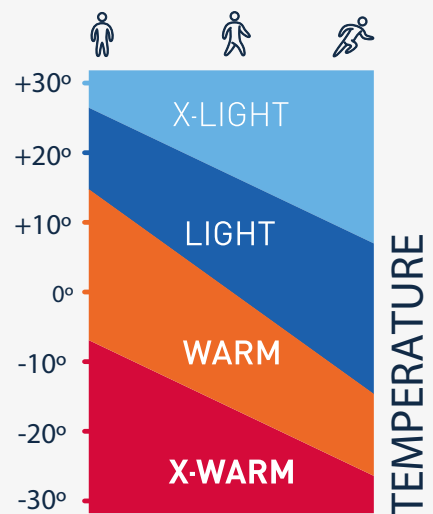

WARM

Highly functional sportswear with excellent thermal insulation that keeps the body warm when it's cold outside. With the fabric's effective moisture wicking properties, the skin is kept dry and warm. Warm thermal quality is ideal for all winter activities.

X-WARM

X-WARM

Sports clothing for extreme cold: Extra-warm [X-Warm] inserts protect sensitive areas of the body at very cold temperatures. Good moisture transport ensures for additional comfort when wearing.

MEMBERSHIP

FAIR WEAR FOUNDATION

When Odlo joined the Fair Wear Foundation (FWF) in 2008 it was the first company specializing in functional clothing to become a member. The FWF is committed as an independent non-profit organization to the improvement of working conditions in the garment industry throughout the world. The FWF verifies, with the help of factory audits (social audits) and a complaint procedure, with corporate audits (management system audits) of their members and extensive consultations with stakeholders in the manufacturing countries, whether companies comply with the established code of conduct.

TESTED FOR HARMFUL SUBSTANCES

OEKO -TEX 100

Odlo's Functional Underwear bears the Oeko-Tex® label "Confidence in Textiles," which certifies textiles tested for harmful substances in accordance with the Oek-Tex Standard 100. Our product meets the current human-ecological requirements: no carcinogenic ingredients, no formaldehyde, free of allergy-causing dyes, skin-friendly pH value.

PACKAGING

THE GREEN DOT

All of Odlo's underwear packaging is marked with the "Green Dot" and is, thus, completely recyclable.

PRODUCT FEATURES

3-IN-1

3-IN-1

Odlo's 3-in-1 concept merges a wind- or waterproof layer with an (insulating) midlayer in one versatile and highly functional combination. 3-in-1 layers can be either worn as combined style or as single layers.

CERAMICOOOL

CERAMICOOOL

SEAMLESS CERAMICOOOL

CERAMICOOOL SEAMLESS

Ceramicool technology combined with seamless garment's construction.

DYNAMIC LAYERING SYSTEM

DYNAMIC LAYERING SYSTEM

The ODLO Dynamic Layering System ensures that regardless of weather conditions different layers work perfectly together to match the usage purpose and create a highly enhanced level of functionality and wearer comfort.

PACK ME!

PACK ME!

This product is made to be carried in a compact way.

REMOVABLE PADDING

REMOVABLE PADDING

Removable padding for perfect adaption of the bra to consumer's personal preferences.

REVERSIBLE

REVERSIBLE

This product is made to be worn from both sides.

SPRAY PROTECTION

SPRAY PROTECTION

Water repellent 3 layer material protects your lower back and your valuables from water and dirt.

50+ UV-PROTECTION

UVP

Odlo offers clothing with lasting protection that continues for the product's entire life cycle, without the aid of chemical treatments. The use of very dense fabric allows for effective protection against UV radiation.

LABELS

PRODUCT FEATURES

WATCH COMPATIBLE

WATCH COMPATIBLE CUFF

Integrated cuff solution made for additional comfort while wearing a sportwatch.

ZIP IN

ZIP IN

Odlo's ZIP IN offers a solution for all weather conditions, temperatures and activities. Different hardshell jackets, midlayers and insulation styles can be easily zipped together to achieve protection and warmth. Each ZIP IN style can also be worn as single layer.

FUNCTIONAL MATERIAL

CERAMICOOOL

CERAMICOOOL

Ceramicool is an active cooling technology, which cools your skin temperature by up to 1°C and facilitates optimal physical performance during your activity. It offers UV protection and protects your skin from sunburn.

ODLO F-DRY

F-DRY

ODLO F-dry is the allround Sports Underwear quality, suitable for a wide range of activities and characterized by outstanding moisture management and highest wearing comfort. F-Dry will keep you dry and comfortable 365 days a year.

LOGIC WATERPROOF

LOGIC WATERPROOF

Protects against rain, wind and weather. The innovative material technology LOGIC Waterproof effectively protects the body like a third layer from external influences. The material is waterproof, windproof and breathable.

LOGIC WINDPROOF

LOGIC WINDPROOF

Effective protection against wind-chill. Depending on the wind speed, the perceived temperature can often be significantly lower than the measured external temperature. LOGIC Windproof from Odlo reduces the effects of wind-chill. This material is extremely breathable, windproof and water repellent.

PERTEX

Pertex Quantum is a light and strong fabric offering a significant weight reduction without sacrificing strength and abrasion resistance. It is windproof, downproof and the fabric's softness allows insulation in your jacket to have more loft.

FUNCTIONAL TREATMENT

ODLO
EFFECT

EFFECT

Counteracts the unpleasant smell of sweat. The functional treatment effect, silver ions applied onto the material, stops the multiplication of bacteria and effectively prevents unpleasant odors. effect is completely skin-compatible, durable and offers optimal climate comfort.

CYCLING PADDINGS

PADDING: GOLD

This is our most sophisticated padding, which with extreme anatomical construction provides more riding comfort due to perfect body alignment to the pedalling movement, 3D light mesh ensures additional breathability and the air plus fabric guarantees you enjoyable rides due to the superb moisture management.

PADDING: SILVER

Odlo Silver padding is the best combination of comfort and stable support. Featuring increased ventilation, the silver padding boasts a high density and peerless moisture management, making it ideal for long-distance rides.

PADDING: BRONZE

Odlo Bronze padding provides an all-round support level for all kinds of athletes and activities, including road, city and Mountain biking.

MATERIALS

LAMINATE

Functional laminates are two or three materials which are connected by means of an adhesive. One of the layers can be a membrane. The membrane makes the material wind- and waterproof. It nevertheless allows moisture to move from the inside to the outside, so it is breathable.

Laminates can also be materials that are glued together without a membrane. These kind of laminate benefit from the varying characteristics of the two materials.

3L HIGH DENSITY SOFTSHELL LIGHT

Extremely thin, 3-layer soft shell with high breathability, high elasticity and a soft feel, thanks to the knitted structure inside and out. The membrane is waterproof and windproof.

*Composition: 100% Polyester
Water Vapour Permeability: 10.000
Washing Instructions: 40°C*

LOGIC 2.5-LAYER DOBBY

Waterproof 2.5-layer with structure, half layer avoids clinging to the skin; FC free water repellent finish.

*Composition: 100% Polyamide
Water Column: 10.000
Water Vapour Permeability: 10.000
Washing Instructions: 40°C*

LOGIC SOFT PLAIN 2.5L

Lightweight and soft 2.5-layer fabric, designed with a functional print on the back that prevents the material from sticking to the skin. Extremely breathable, waterproof and windproof. flourcarbon free DWR finish.

*Composition: 100% Polyamide
Water Column: 20.000
Water Vapour Permeability: 20.000
Washing Instructions: 30°C*

KNITTED

A knitwear combination of functional fibres. The loop is created with knitting needles. By using various knitting techniques, different surfaces are created. Elasticity, insulation and moisture transport can be steered through the binding.

3D DIAMOND MESH

Stretchable warpknit mesh with 3D structure for aerodynamic flow

Composition: 75% Polyamide, 25% Elastane
Washing Instructions: Gentle 40°C

BIKE EYELET

Polyester material with eyelet structure for perfect moisture wicking and quick drying.

Composition: 100% Polyester
UV factor: 30
Washing Instructions: 40°C

CERAMICOOOL JACQUARD MESH

Jacquard mesh with cooling yarn for extra cool function.

Composition: 100% Polyamide
Washing Instructions: 30°C

CERAMICOOOL MESH

Cooling elastic mesh structure with high UV protection.

Composition: 91% Polyamide, 9% Elastane
UV factor: 20
Washing Instructions: 40°C

CERAMICOOOL PLAIN

Cooling elastic jersey material with high UV protection.

Composition: 86% Polyamide, 14% Elastane
UV factor: 50
Washing Instructions: 40°C

COOL MESH

Lightweight stretchable mesh structure for good ventilation and at the same time high UV protection.

Composition: 91% Polyester, 9% Elastane
UV factor: 20
Washing Instructions: 40°C

COOL PLAIN

Lightweight stretchable PES jersey material with EFFECT, good moisture management, quick drying; high UV protection.

Composition: 86% Polyamide, 14% Elastane
UV factor: 50
Washing Instructions: 40°

COOL WOOL JERSEY LIGHT

Perfect combination of wool and Tencel for perfect temperature control in summer.

Composition: 50% Lyocell (Tencel), 50% Virgin Wool (Merino)
Washing Instructions: 30°C

COOL WOOL JERSEY ULTRA LIGHT

Perfect combination of wool and Tencel for perfect temperature control in summer.

Composition: 50% Lyocell (Tencel), 50% Virgin Wool (Merino)
Washing Instructions: 30°C

CUBIC EFFECT

Ultra-lightweight knitwear in cubic texture. The 3-dimensional texture of this material keeps it from sticking to the skin. Optimum body climate through excellent moisture wicking and fast drying properties.

Composition: 100% Polyester
Washing Instructions: 60°C

CYCLING ASTERIA

Very fine, light highly elastic knitwear, very good moisture management and extremely short drying time.

Composition: 86% Polyester, 14% Elastane
Washing Instructions: 40°C

CYCLING TIMEOUT

Textured knit fabric, 100% polyester. Extreme, high level breathability and excellent moisture wicking provide optimal wearing comfort.

Composition: 100% Polyester
Washing Instructions: 40°C

DOUBLEKNIT JACQUARD

Jacquard construction with different structure and different colors on both sides.

Composition: 100% Polyester
Washing Instructions: 40°C

MATERIALS

KNITTED

DRI-RELEASE 0.5CM X 0.3CM STRIPE JERSEY

Cotton-Dri release yarn in combination with 100% PES for natural touch, high moisture management, quick drying; stripe design.

Composition: 91% Polyester, 9% Cotton
Washing Instructions: 40°C

DRI-RELEASE 1X1 STRIPE JERSEY

Cotton-Dri release yarn in combination with 100% PES for natural touch, high moisture management, quick drying; stripe design.

Composition: 91% Polyester, 9% Cotton
Washing Instructions: 40°C

EVOLUTION X-LIGHT EFFECT

Highly elastic seamless garment with EFFECT. Integrated structures and ventilation zones give an excellent moisture management and perfect breathability at minimum weight. Seams are reduced to a minimum.

Composition: 70% Polyester, 30% Polyamide
Washing Instructions: 40°C

F-DRY EYELET EFFECT

Super soft, highly stretchable lightweight knit construction with highest moisture management and extremely quick drying time. Due to its combination with Polypropylene on the skin side, it shows a high permanent wicking properties that the skin always stays dry. For sure, the material is treated with our permanent anti bacterial finish EFFECT.

Composition: 90% Polyester, 10% Polypropylene
UV factor: 50
Washing Instructions: 40°C

F-DRY EYELET LIGHT EFFECT

Super soft, highly stretchable lightweight knit construction with highest moisture management and extremely quick drying time. Due to its combination with Polypropylene on the skin side, it shows a high permanent wicking properties that the skin always stays dry. For sure, the material is treated with our permanent anti bacterial finish EFFECT.

Composition: 100% Polyester
UV factor: 20
Washing Instructions: 40°C

FINE TRICOT EFFECT

Thin very soft tricot structure for high wear comfort.

Composition: 79% Polyamide, 21% Elastane
Washing Instructions: 40°C

HIGH DENSITY DOUBLEKNIT EFFECT

Very light, tight knit with high UV protection and EFFECT function. In its construction, the material is elastic without the use of elastane. The fabric is lightweight and still very tight. Moisture wicking and quick drying are guaranteed.

Composition: 100% Polyester
UV factor: 50
Washing Instructions: 40°C

HYDROTRICOT EFFECT

Lightweight soft warpknit fabric with UV protection, moisture management, quick drying and anti bacterial treatment.

Composition: 100% Polyester
UV factor: 20
Washing Instructions: 30°C

JERSEY 230 ACTIVE

Elastic single jersey made of polyester micro-fibers with soft, matte finish. The bi-elastic fabric with exceptional elasticity allows for optimum freedom of movement.

Composition: 93% Polyester, 7% Elastane
Washing Instructions: 30°C

JERSEY MELANGE PLATED (PES DYED)

Functional cotton jersey material with PES inside and Cotton outside. The material shows a high-level of function, while retaining a natural appearance and feel.

Composition: 52% Polyester, 48% Cotton
Washing Instructions: 40°C

LIGHT COMFORT STRETCH JERSEY

Light soft PES stretch jersey for high wear comfort.

Composition: 88% Polyester, 12% Elastane
Washing Instructions: 40°C

KNITTED

LIGHT PEACHED STRETCH JERSEY

This lightweight and elastic jersey material is wonderfully soft and has a slightly brushed surface that gives it a very pleasant feel. The material offers high UV protection, dries quickly and has good wicking properties.

Composition: 100% Polyester
Washing Instructions: 40°C

LIGHT PIQUE BRUSHED

Stretchy, double-sided polyester knit with a slightly brushed interior. Due to its perfect moisture wicking and excellent breathability, this soft material provides a high level of comfort when wearing.

Composition: 100% Polyester
Washing Instructions: 40°C

MERINO 200

Finest possible Merino wool, very soft handfeel and high wear comfort; due to the natural function of the wool ideal for moderate sports.

Composition: 100% Virgin Wool (Merino)
Washing Instructions: 30°C

MESH ARIANE

Very soft, open and extensible mesh for ventilation inserts.

Composition: 78% Polyester, 22% Elastane
Washing Instructions: 40°C

MESH SOLE

Very soft, open and stretchable mesh for ventilation inserts.

Composition: 78% Polyamide, 22% Elastane
Washing Instructions: 30°C

MINI JACQUARD

PES knit with subtle structure, high moisture management and quick drying time.

Composition: 100% Polyester
UV factor: 50
Washing Instructions: 40°C

MIX JERSEY SOLID

Cotton/PES jersey with soft handfeel, the high PES content let the material quickly dry.

Composition: 50% Cotton, 50% Polyester
Washing Instructions: 40°C

PEACHED STRETCH JERSEY

This lightweight and elastic jersey material is wonderfully soft and has a slightly brushed surface that gives it a very pleasant feel. The material offers high UV protection, dries quickly and has good wicking properties.

Composition: 88% Polyester, 12% Elastane
UV factor: 50
Washing Instructions: 40°C

PERFORMANCE COTTON TERRY MELANGE

PES terry inside, cotton outside for optimal function with natural fibers.

Composition: 80% Polyester, 20% Cotton

PES JERSEY

Functional Polyester jersey material with soft handfeel, good moisture management and the function EFFECT.

Composition: 100% Polyester
Washing Instructions: 40°C

PES JERSEY MELANGE EFFECT

Functional polyester jersey fabric with melange look, soft feel and good wicking properties with the EFFECT function. Also available in uni version.

Composition: 100% Polyester
Washing Instructions: 40°C

PINEAPPLE JERSEY

Structured jersey with a content of PES/Tencel to give next to good moisture management certain cooling to the material for summer.

Composition: 77% Polyester, 19% Lyocell (Tencel), 4% Elastane
Washing Instructions: 40°C

POWER JERSEY STRETCH ACTIVE

High elastic jersey with high content of elastane for high comfort with tight fit.

Composition: 78% Polyester, 22% Elastane
Washing Instructions: 40°C

POWER JERSEY STRETCH ACTIVE BLACK LYCRA

High elastic jersey with high content of elastane for high comfort with tight fit.

Composition: 78% Polyester, 22% Elastane
Washing Instructions: 40°C

MATERIALS

KNITTED

POWER JERSEY STRETCH DARK EMBOSSED

Elastic jersey with high content of elastane for highest comfort with compact fit.

*Composition: 77% Polyamide, 23% Elastane
Washing Instructions: 40°C*

POWER JERSEY STRETCH MESH

Elastic open structure for functional inserts.

*Composition: 83% Polyester, 17% Elastane
Washing Instructions: 40°C*

SILKY JERSEY

Soft elastic functional jersey material with silk. The high PES content gives the material the function of quick drying and moisture management, silk offers the soft handfeel and a perfect thermoregulation for the summer.

*Composition: 78% Polyester, 14% Silk, 8% Elastane
Washing Instructions: 30°C*

SOFT BRUSHED STRETCH SOLID

Stretch knit material with slightly brushed in- and outside, gives a super soft handfeel and good insulation, very good moisture management as well as quick drying.

*Composition: 90% Polyester, 10% Elastane
Washing Instructions: 40°C*

SOFT STRETCH JERSEY

Soft, stretch jersey fabric for perfect fit and good support.

*Composition: 85% Polyamide, 15% Elastane
UV factor: 50
Washing Instructions: 40°C*

STRETCH PERFORMANCE MESH

Soft stretchable mesh for ventilation inserts, high moisture management, quick drying.

*Composition: 88% Polyester, 12% Elastane
Washing Instructions: 40°C*

STRIPED DOUBLE KNIT

Highly functional double knit construction with inside PES for perfect moisture management and outside Tencel for cooling, with EFFECT .

*Composition: 77% Polyester, 23% Lyocell (Tencel)
Washing Instructions: 40°C*

TIMOR

PES eyelet structure with moisture management.

*Composition: 100% Polyester
Washing Instructions: 30°C*

TRICOT POWER STRETCH ACTIVE

Highly elastic, knitted fabric with high durability and good stretch comfort with elastane.

*Composition: 80% Polyamide, 20% Elastane
Washing Instructions: 40°C*

TRICOT POWER STRETCH PERFORMER

Highly elastic knitted fabric with high durability, extreme stretch elastane comfort and UV protection.

*Composition: 80% Polyamide, 20% Elastane
Washing Instructions: 40°C*

TRICOT POWER STRETCH SHIELD

Highly elastic, knitted fabric with high durability, extreme stretch elastane comfort and UV protection.

*Composition: 80% Polyester, 20% Elastane
Washing Instructions: 40°C*

WOVEN

Woven materials which are produced on looms. The material is comprised of two thread systems warp and weft, which are woven together. Various bindings create different surfaces. Through the use of elastane, woven fabrics can also be very elastic.

FOUR WAY WOVEN STRETCH

Lightweight stretchable plain weave material.

*Composition: 86% Polyester, 14% Elastane
Washing Instructions: 40°C*

MICROTOUCH WICKING

Lightweight weave with high moisture transport and good breathability.

*Composition: 100% Polyester
Washing Instructions: 40°C*

MINI RIBSTOP WIND

Windproof ripstop structure, lightweight, breathable; flourcarbon free DWR finish.

*Composition: 100% Polyamide
Washing Instructions: 40°C*

PERTEX® RIPSTOP QUANTUM

Lightweight and durable polyamide material with high tear and abrasion resistance. This fabric is extremely soft and has high breathability. It is also windproof and down-proof.

*Composition: 100% Polyamide
Washing Instructions: 40°C*

PLAIN WOVEN STRETCH COOLING

Lightweight stretch woven with special cooling properties.

*Composition: 86% Polyamide, 14% Elastane
Washing Instructions: 40°C*

SPORTY WOVEN CHECK

Woven check with good moisture management, EFFECT and UV protection.

*Composition: 100% Polyester
UV factor: 30
Washing Instructions: 40°C*

WOVEN

STRETCH NYLON PLAIN WEAVE DWR

Robust stretchable plain weave with FC free DWR finish.

*Composition: 95% Polyamide, 5% Elastane
UV factor: 50
Washing Instructions: 40°C*

WOVEN MESH

New woven constructions with mesh character for lightweight and high ventilation.

*Composition: 50% Polyamide, 50% Polyester
Washing Instructions: 30°C*

WOVEN STRETCH CHECK MEN

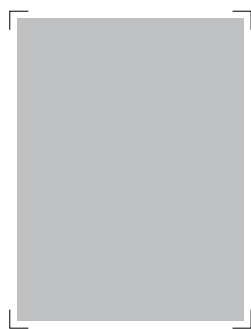

Functional check with Elastane for highest comfort.

*Composition: 97% Polyester, 3% Elastane
UV factor: 30
Washing Instructions: 40°C*
