

THE VENTILATED PINNACLE

Since 2005, Osprey have led the market in ventilated backpacks. In Spring 2018, this heritage lends its experience to exciting new ranges, including the highly commercial Hikelite, the superlight Exos & Eja, and the pinnacle of ultralight performance with Levity.

NEW HIKELITE

Combining ventilation with value, Hikelite establishes a new primary position within our Hiking range.

BACKSYSTEM

AirSpeed™ trampoline
suspended mesh backsystem

FABRICS

100D Nylon Mini Diamond Shadow
500D Nylon Packcloth

KEY FEATURES

- AirSpeed™ trampoline suspended mesh backsystem
- Integrated & detachable raincover
- Front shove-it pocket [*Hikelite 26 only*]
- Stretch mesh side pockets
- Internal hydration sleeve
- Removable webbing hipbelt
- Side compression straps
- Sternum strap with emergency whistle
- Zippered panel access
- Trekking pole attachment
- Zippered scratch-free sunglasses and electronics pocket

Hipbelt pockets

Women's Fit

Designed for Women.

Our women's packs all feature a back system that has been specifically designed to provide an optimum fit for a female body, offering unparalleled levels of comfort and support.

1 Narrower Shoulder Width

The shoulder harness is specifically proportioned and designed with varying padding thickness to create an anatomical fit for a woman's neck, shoulder and chest.

2 Ergonomically Shaped Harness

Ergonomically shaped harness is contoured to sit around the side of the body, creating a more comfortable women's specific fit.

3 Shorter Torso Length

The pack's designed to be shorter, narrower and with added depth in the right places to allow greater freedom of movement and stabilisation.

4 Specially Designed Hipbelt

We sculpt and angle our hipbelts to better suit a female hip shape for optimal support. The conical design sits comfortably and prevents rubbing on the ribs or thigh.

Backsystem Types

AG ANTIGRAVITY™ 3D

Using our peripheral suspension design this lightweight, body contouring, three dimensional suspension literally allows the wearer to move as if they don't have a pack on. Seamless suspended mesh from the shoulder blades to the lumbar and even into the hipbelt region disperses and balances the load like nothing ever has before.

AIRSPEED™

Using our peripheral suspension design this lightweight, three dimensional suspension eliminates foam and backpanel materials and replaces it with lightweight suspended mesh. Three dimensionally shaped to allow maximum airflow and optimal tension and load carry sets us apart from other tensioned mesh backpacks.

AIRSCAPE™

Our AirScape™ mesh-covered ridge foam backpanels sets a new standard in the industry. With its ability to keep the weight close, provide cushion, allow ventilation and add load carry is quite a list of needs from this unassuming backpanel. It successfully accomplished all of that in a way that allows it to be used in the large gear hauling packs and our lightweight day hiking packs.
