LENS SIMULATOR

E L E C T R A

FIRST EVER
BATTERYLESS
ELECTRONIC GOGGLE

THE ONLY LENS
YOU'LL EVER NEED

It automatically adapts darkness according to the surrounding light in just a few hundredths of a second!

Unlimited gradiations of darkness for an unlimited performance.

Forget about changing lenses, forget about batteries and buttons, let the Electra protect your eyes.

The revolution starts today: be a part of it.

Patent pending

STORM

DESIGNED IN COLLABORATION WITH THE

UNIVERSITY OF MILAN

DEPARTMENT OF PHYSICS

The Storm is the result of one year of research and developement.

Together with a group of researchers from the university of Milan we travelled the mountains measuring with a spectrophotometer the amount of light in foggy, snowy and cloudy conditions and gathered a huge amount of data.

From this base we designed the absoption spectrum of the lens, then produced by Zeiss.

THE BEST PERFORMANCE

IN THE TOUGHEST CONDITIONS

LENS BY

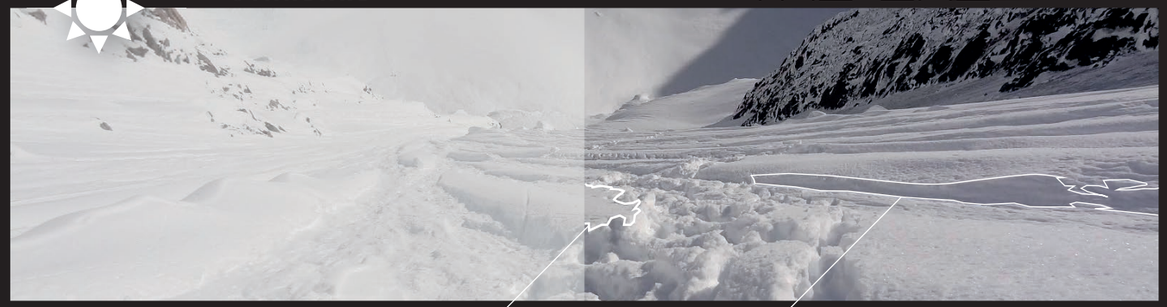
ZEISS

THE ONE

PHOTOCHROMIC POLARIZED LENSES

STANDARD

THE ONE



The One's polarized filter
removes glare and scattering +

The One's neutral filter
gives a correct perception
of shadows and colors +

STANDARD

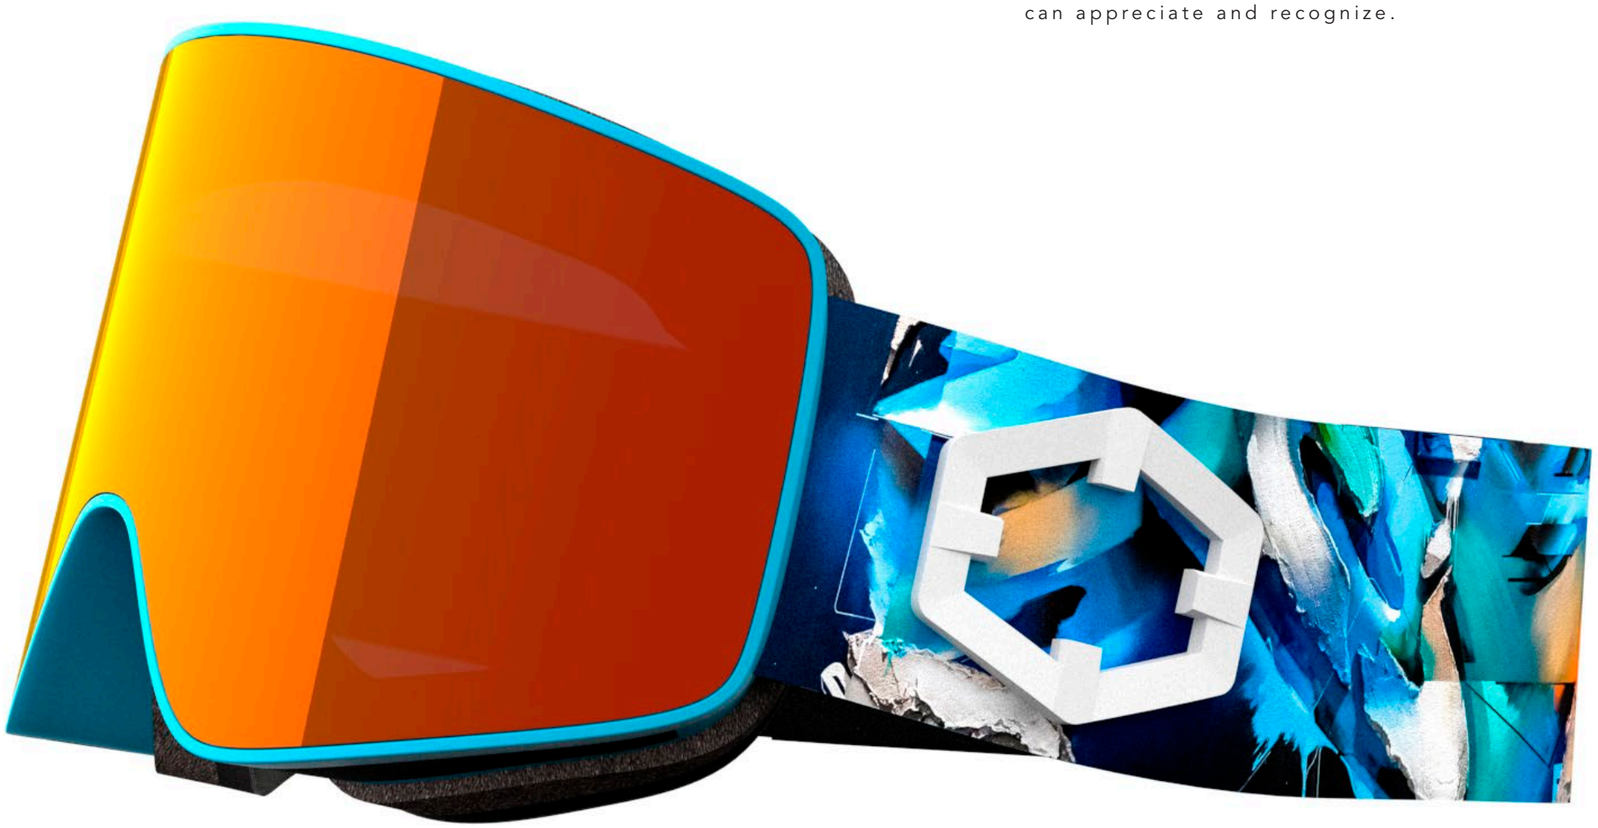
THE ONE

The One's polarized filter improves
perception of ground shape +

Yellow pigments help
recognizing snow texture and
contrast blue dominant lighting +

D O E S

Former professional soccer player Joos ‘DOES’ van Barnevel is a Dutch multidisciplinary artist.
Out Of is proud to present the very first limited edition graphic made in collaboration with him.
The elaborate shapes, the attention to every single detail and the precision of his work create masterpieces that anyone can appreciate and recognize.



CITYSCAPE

Skyscrapers and lights. Noises and busy roads.
We escape them all surfing white powder in narrow trails
in the woods.
We feel alive; we breathe in the fresh air of the mountains
and for a while, we can forget the chaos and the deadlines.
We can be in the moment and fully enjoy nature.

MOTHERBOARD

Chipsets, motherboards, electric circuits and algorithms
shape our lives.
The way we perceive reality is filtered through millions
of cables and we too often forget that life is beyond a screen.
Go further, dive deeper, let the thrill of life fill you to the
tips of your toes.
