

TECH APPROACH

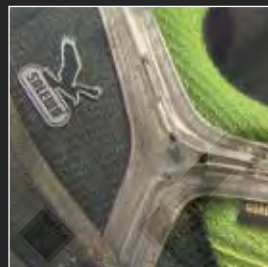

A REVOLUTIONARY FOOTWEAR CONCEPT WITH ALL ALPINE TECHNOLOGIES SUCH AS SUPER STICKY CUSTOM-MADE VIBRAM® OUT-SOLES, PROTECTION ARAMIDIC RANDS, CLIMBING LACING AND A CUSTOMIZABLE FIT COMBINED WITH THE COMFORT OF TRAIL RUNNING SHOES.

THE
ALPINE FIT
100% BLISTERFREE

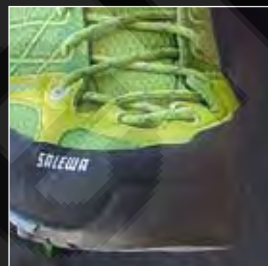

3F POWER

Unbeatable combination of flexibility, support and precision in fit. Improved with a steel wire for additional heel containment. Anatomically positioned.

EXTENDED CLIMBING LACING

A technical extended lacing towards the front which allows a full fit customization providing precision and comfort.

ARAMIDIC FIBRE RANDS

Enhances both protection from rocky edges as well as grip during the climbing phase.

FIRE AND FIRE ARAMIDIC SOLE SYSTEM

An innovative sole construction mixing the lightness and the propelling efficiency of EVA with the cushioning and durability of the PU heel shock absorber.

VIBRAM® SALEWA SOLE

A specific approach outsole developed by SALEWA together with Vibram engineers to ensure a maximum grip on rocks. The special design gives an outstanding grip on rocks, perfect edging while climbing (blocked toes lug) and unmatched brake-abilities on the descent thanks to the heel edge utilising the super-sticky compound TC1.
