

**istruzioni** .....

**ST Blade**

instructions

**ST BLADE** - knife is made to meet all spearfishers' needs, designed and built to stand a deep use in unfavourable conditions.

**Use** - the blade has 2 cutting edges, one is jagged and one is smooth.

The 8 mm  $\emptyset$  hole is a lever point to straighten up the shafts. The notch on the bottom works as a shaft remover. Thanks to the removable rubber sword-knot you can keep it hold on your hand without losing it.

**Maintenance** - sea environment and overall the direct contact with salty water, put a strain on all kind of material. We recommend to clean carefully with freshwater and wipe it. We suggest to protect the blade with a thin coating of silicon oil.

The handle can be easily removed for cleaning and replacing the sword-knot.

**Warning** - salvimar shall not be held liable for accidents and/or injuries to persons or damages to property due to inaccurate or intentional use.

**We recommend to:**

- Pay close attention in using the knife
- Keep and bring the knife in its case, according to the laws of the country
- Keep away from children
