

Zero Waste Smart bottle

SKU: TEOCNBOTTLEB

400 ml eco-friendly thermal bottle with LED touch screen and Drinking Reminder function, stainless steel, IPX7, blue color

WHY CHOOSE THE THERMAL BOTTLE?

The **400 ml Zero Waste Smart Bottle** is the insulated water bottle to eliminate waste for good. Replace plastic bottles with this **eco-friendly accessory** made of stainless steel. The cap has an LED touch screen that lets you know the temperature of the liquid inside; by activating the drinking reminder function, the display will remind you to drink by lighting up at one-hour intervals.

ENVIRONMENTAL SUSTAINABILITY

Unlike disposable plastic bottles, this **thermal bottle** is reusable whenever you want. The stainless steel is durable and the internal coating prevents the persistence of unpleasant odours and flavours of previously consumed liquids, after rinsing by hand.

The packaging containing the smart bottle is also **plastic-free**, meaning it is made of **100% recycled paper**. **Eco-friendly ink** has been used for printing. By choosing products from the Collezione Oceano you also contribute to the cause of **Marevivo**, the Italian association for the defence of the sea and its resources.

THE ADVANTAGES OF A SMART BOTTLE

Fill the smart bottle with liquid and not even a drop will leak out, thanks to the airtight cap. On top of this closure, there is an IPX7 certified **LED touchscreen display**, which is splash-proof. Keep drinks hot or cold: you can **check the temperature inside** through a drop-shaped icon which changes colour depending on the temperature: red between 60° - 98°, yellow between 60° - 37°, blue under 37°.

By pressing the touch screen for about three seconds, you can activate another clock icon indicating the **Drinking Reminder** function. The display will flash every hour to remind you to drink: a useful aid to **achieving or maintaining a healthy lifestyle**.

Thanks to its modern slim design, you can carry it in your backpack or briefcase: never be separated from it, whether you're doing your hobbies or at work.

200 DAYS WITH A CHARGE

Included in the package is a USB to Micro USB cable designed to charge the touch display. Unscrew the top of the cap and, with a single charge, the screen will work for **200 days in a row**.

FEATURES:

- Material: stainless steel
- LED touch screen display
- Drinking Reminder function
- Liquid temperature display
- Temperature range measured: 0° - 98°
- Internal battery: 300 mAh
- Battery life: 200 days
- Charging time: 2 hours
- IPX7 certification: resistant to water splashes
- Capacity: 400ml
- Weight: 253g without liquid
