

Co-BELT

Use the Co-BELT to join the ski jacket and pants to create an overall: You can find the Co-BELT Interface (CBI) elements on the jacket snow flap. Fold them to the inside at the lower edge of the Co-BELT, which is threaded through the belt loops on the ski pants. Fasten the Velcro tabs. Ready to go!

Dermizax®EV

The heavy-duty fabric that redefines the meaning of comfort in performance fabrics. It has excellent waterproof and breathability properties, as well as being strong.

- + Extremely waterproof (> 20,000 mm) and windproof during any type of exercise
- + Efficient membrane structure (MVTR 20,000 g/m²/24h) guarantees excellent breathability
- + Elastic, non-porous membrane guarantees extreme durability
- + Soft and quiet to the touch
- + Permanently water repellent. Water repellency of 80 points still guaranteed even after 20 washes. (C6 WR)

Down

For its down-filled items, Schöffel only uses grey duck down that is never sourced from foie gras production or from live-plucked birds. Schöffel has signed up to the „Cruelty Free Down Challenge“ set up by the international animal welfare organisation FOUR PAWS to ensure and demonstrate that the down we use is sourced from cruelty-free farms.

Added to which, we only buy our down from RDS (Responsible Down Standard) certified sources.

- + Maximum thermal performance despite being lightweight
- + Breathable

Gore-Tex®

GORE-TEX® guarantees lasting water- and windproofing while at the same time optimising breathability, creating durable products offering maximum protection and comfort.

- + Maximum weatherproofing
- + Extremely waterproof, > 28.000 mm
- + Windproof
- + Maximum breathability, RET < 9 PA m²/W, MVTR 10.000 g/m²/24h
- + Lightweight
- + Water repellent, C6 WR

Gore® Windstopper®

WINDSTOPPER® softshell clothing keeps out the cooling wind chill effect without sacrificing excellent breathability. With its combination of warming insulation layer and protective layer it is the versatile choice for all outdoor activities.

- + Utterly windproof
- + Breathable
- + Extremely water repellent
- + Rub resistant
- + Extremely versatile
- + Superbly comfortable

MTS

a fabric finish for moisture regulation. This system quickly absorbs moisture and distributes it throughout the fabric, causing it to evaporate and dry more quickly

- + Optimal moisture transfer
- + Quick drying

Pertex Quantum

Pertex Quantum® uses extremely fine threads to create fabrics that are very lightweight yet still extremely strong and durable. Their softness makes down and synthetic insulations feel bulky.

- + Extremely lightweight (35g/m²) yet still very strong
- + Windproof
- + Water repellent, C6 WR, 80/20 performance guaranteed
- + Breathable
- + Soft to the touch
- + Downproof

PrimaLoft® Gold Active

Flexible insulation, 4-way stretch, breathable, thermally efficient and water repellent. Ideally suited for intensive activities, uncompromising performance for a huge range of situations and requirements.

- + 4-way stretch
- + Water repellent
- + Warm without being bulky
- + Breathable
- + Water repellent
- + Compressible and lightweight
- + Extremely soft

PrimaLoft® Gold

PrimaLoft® Gold sets performance benchmarks as the premium product among synthetic insulating materials. This micro-fibre technology is synonymous with peak performance, especially in respect of thermal efficiency, warmth to weight ratio and water repellency.

- + Water repellent
- + Warm without being bulky
- + Breathable
- + Compressible
- + Lightweight
- + Extremely soft
- + Retains 98% warmth even when wet

PrimaLoft® Silver

PrimaLoft® Silver Insulation was designed especially to be hard wearing yet lightweight, suitable for physical activity, and compressible. This insulation keeps wearers warm even when wet.

- + Water repellent
- + Warm without being bulky
- + Breathable
- + Compressible
- + Lightweight
- + Extremely soft

VENTLOFT powered by PrimaLoft®

The exclusive insulation padding developed by Schöffel guarantees optimal warmth and compressibility, making it ideal for pack-away products, in particular.

- + Strongly compressible
- + Water repellent
- + Warm without being bulky
- + Breathable
- + Lightweight
- + Extremely soft
- + Recycled material

Tecnopile®

is used to make versatile fleece products that are superbly comfortable and suitable for a wide range of activities.

- + Good thermal insulation despite being lightweight
- + Quick drying
- + Breathable
- + Easy care
- + Low susceptibility to pilling

Tecnostretch

Perfect as basic and midlayers. The outside is hard wearing, while the inside transfers moisture to the outside. Enhanced with a stretch component that ensures a perfectly snug fit.

- + Good thermal insulation despite being lightweight
- + Quick drying
- + Breathable
- + Easy care
- + Low susceptibility to pilling

Venturi

Venturi clothing – exclusively available from Schöffel – features a high-performance laminate that is both protective and superbly functional.

- + Permanently waterproof, min. 10,000 mm
- + Windproof
- + Breathable, MVTR 10,000 g/m²/24h
- + Water repellent, C6 WR

Venturi Stretch

Venturi stretch clothing – exclusively available from Schöffel – combines protection and functionality with a very high level of elasticity, thanks to an efficient laminate.

- + Permanently waterproof, min. 10,000 mm
- + Windproof
- + Breathable, MVTR 10,000 g/m²/24h
- + Stretch fabric for a perfect fit and freedom of movement
- + Water repellent, C6 WR

Venturi Softshell Stretch

Venturi softshell stretch clothing – exclusively available from Schöffel – brings together in one product the comfort of stretch fabric with the thermal and protective properties offered by an insulating and protective layer.

- + Utterly windproof
- + Extremely water repellent, C6 WR
- + Breathable
- + Stretch
