

# ProWÆB

WARM

- PrimaLoft® insulation's silky softness, high loft and incredible warmth mimics goose down, but it's engineered with proprietary finish technology to deliver permanent water resistance.

**3M**  
**Thinsulate**  
INSULATION

- Thin yet protective, the trusted warmth of 3M™ Thinsulate™ Insulation is your low-profile answer to cold. The microfibers that comprise 3M™ Thinsulate™ Insulation efficiently trap insulating air, reflect radiant body heat, and deliver warmth that is two times greater than down and other polyester insulations, when equal thicknesses are compared.

## ThermaWEB™

- Spyder's proprietary ThermaWEB™ insulation contains ultra-fine fibers that trap and hold body heat, to efficiently keep you warm while maintaining breathability.

## Down

- Down is nature's perfect insulator. Its tiny fibers are lightweight, compressible, and efficiently hold body heat. Down is rated in "power fill." The higher the number, the greater the quality. The greater the quality, the better the warmth.

Synthetic  
**Down**

- Synthetic Down is a 100% Polyester insulation fill that is as lightweight as natural down, is highly breathable and extremely warm...even when wet.

DRY

## HydroWÆB

- Spyder's proprietary HydroWEB™ is an ultra-thin membrane that delivers superior waterproofing and breathability. Snow and rain are blocked from penetrating the outer shell of the fabric, while a moisture transfer system moves perspiration away from you.

**PERTEX SHIELD**

- Available in both two and three-layer systems, Pertex® Shield provides a perfect balance of waterproofing, breathability, and wind and water repellency, with flexibility and lightweight construction. The fabric is incredibly light, but dominates against weather.

**PERTEX MICROLIGHT**

- The perfect balance of weight, softness and durability. The tightly woven construction is well balanced; preventing excessive heat loss through the fabric while offering significant weight reduction and excellent strength.

## Spylon™

- Spyder's proprietary DWR Spylon™ hydrophobic finish repels rain and snow, decreases dry time, and keeps you outside longer.

- GORE-TEX® is the ideal solution for all kinds of winter sports; it's durably waterproof, windproof, and highly breathable. Your hands stay warmer when it's cold, and drier when you perspire. GORE-TEX® gloves boast a "Guaranteed to Keep You Dry" promise.

MOISTURE  
MANAGEMENT

## DryWEB™

- Spyder's DryWEB™ technology absorbs and transports perspiration.

SPECIALIZED

- Stryke has the look and feel of a sweater, with the technical performance and comfort of a softshell.
