

ACCESSORIES

Hydrocell Bond is a specific Polyurethane (PU) construction which evacuates humidity up to 5 times more than a standart grip.

Natural Felt provides an important absorption. The thin grip defines the key line of the grip for precise and effective kicks.

Patented system of strings fixation.

Overlast PU is a specific formula with reinforced PU for a stronger durability.

The Wax Resin coating improves the adhesion of the grip up to 50%.

A better adhesion improves your confidence for more power in your strikes.
