

MEDUSAE

MAGIC TOUCH

Highly durable premium K leather has been used on the forefoot to provide the perfect touch. This extends to the midfoot on the medial side to create a passpad for enhanced distribution. Engineered on our new 'snug fit' last to provide a comfortable but secure fit.

MOTION CONTROL

The inclusion of an internal support sock ensures a responsive fit that adapts and responds to the natural movements of the foot. An integrated double A-frame extends from the midfoot to the forefoot for a secure lockdown where the player needs it most. The support sock extends to the collar to deliver a seamless fit that enhances comfort. A super fine TPU outer layer in the rearfoot ensures weight isn't compromised and allows for a contoured moulded heel section for the ultimate 360 Motion Control.

CONTEMPORARY CLASSIC

Medusae is highly engineered and finely crafted. It brings together elements that are both contemporary and classic. Natural materials fused with performance synthetics create a striking aesthetic. Bold colours have been used to draw attention to key features while reflecting the confidence of the athlete. In Medusae, comfort is assured and performance is perfected.
