→ NAVIGATION: MANUFACTURING PROCESS

Approach.

Design

Utilizing the best team in Snowboarding, we cherry pick Union Pros, Reps and Retailers that represent all aspects of snowboarding, deeply infusing them into the development phase. Everything we design occurs on a singular path that leads towards superior product.

Prototype

Constantly investing and reinvesting into new technology, like our HP Multi-Jet Fusion 3D printer allows us to go from paper sketches, to rideable prototypes within a 10 hour turn-around time. This phase insures accurate tooling, and durable parts.

Test

Union Headquarters is located a quick 45 minute drive from the closest gondola. Living and working in the heart of the Italian Alps gives us the opportunity to test in the morning, be back in the office by lunch, adjust / modify designs by the end of the day.

Mfg.

Two manufacturing facilities located on two different continents, The Box is a self-contained, vertically integrated production facility. From injection to painting, assembly and packaging – everything happens with one km radius at both factories.

Innovate

We stand firmly to our commitment of evolving snowboard bindings by constantly introducing cutting edge materials, modern manufacturing processes and pioneering new levels of durability.

Repeat

While snowboarding is obviously a seasonal business, the team at Union never stops. With offices in Europe, North America and Asia, you could say we are open 24 hours a day, 7 days a week.

Line Segmentation

OVERVIEW

With four riding categories to choose from, it's easy to pick a binding that best suits your riding style. From resorts, to the streets, to the backcountry, Union has you covered.

CATEGORY

All Mountain

Instant edge-to-edge response and stable board connection. The Union All-Mountain Series of bindings deliver a performance advantage in all conditions and terrain. Camber Disks and unyielding bombproof design will be found here.

2021-22 New Binding Technology

Magnesium S1 Ratchets

When you ride 100+ days a season your ratchets take a beating. Freezing temps, water damage and constant strapping and unstrapping all play a role in the longevity of a binding ratchet. Lucky for you, the all-new Magnesium 4.0 ratchets are Union's answer to the elements. A fully intergraded spring protected from the harsh outside provide you with Union's best ratchet to date. Longer life span and better spring return guaranteed.

Fast and easy. Quickly switch from touring touring mode to ride mode in the blink of an eye. The new Explorer Split Forward Lean Adjuster (FLAD for short) has been upgraded for improved durability and easier transition with gloves.

Explorer Split FLAD 2.0

Exoframe 5.0 Ankle Strap

The Exoframe 5.0 utilizes tri-axial progressive flex for the perfect boot to binding fit and instant power and response when you're ready to lay down a hard charging, high speed carve. Easily adjust your ankle strap to any boot with the quick snap of the pin adjustment, no tools needed. Just like all Union ankle straps, the Exofame series comes with the safety and security of DuPont™ Hytrel®, so you never miss a day of riding

Travis Rice trusts the Union Falcor for every turn, every cliff drop, and every riding condition. In order to keep up with Travis' demanding riding, we've redesigned and reinforced the iconic Falcor Highback for the 21/22 season. A thicker forged carbon Y-beam, with stronger mounting points and an all-new forward lean adjuster combine for improved durability and response. Designed, Tested and trusted by the man himself.

Falcor Forged Hybrid 2.0

TS 4.0+ Toe Strap

Simple, lightweight, durable - The all-new TS 4.0+ toe strap keeps you locked in for the ride down without letting you know it's there. A new shorter buckle base helps to reduce weight and pressure points. Easily adjust to any boot with the quick snap of the pin adjustment, no tools needed. Available on the 21/22 Atlas FC, Falcor and Explorer FC.

Proof that there's no such thing as entry level at Union Binding Company... The 21/22 Union Flite Pro and Rosa have been fully redesigned from the ground up. All-new Stage 8 Duraflex baseplate combined with the Falcor inspired highback deliver the lightest binding series ever created by Union, and arguably any other brand to date.

→ NAVIGATION: FULL REDESIGN

100% Redesigned Features:

TECH:

Highback

Inspired by the best freestyle highback on the market, the all-new Flite Pro and Rosa highbacks take design elements and riding characteristics from the Union's Falcor and bring them down to to our entry level price point. Super lightweight, incredibly durable and perfect for beginner to advanced freestyle riding.

TECH:

Baseplate

Introducing our lightest baseplate ever. The all-new Stage 8 Duraflex baseplate helps shave over 10 grams off the Flite Pro and Rosa's total weight. Not to mention, it's compatible with all existing mounting patterns right out of the box. This is just another example of Union's commitment to the best possible binding at all price points

TECH:

Toe Strap

Simple, lightweight, durable - The all-new TS 4.0 toe strap keeps you locked in for the ride down without letting you know it's there. Easily adjust to your boot size, and get ready for season long foot comfort.
