

TECHNOLOGIES

SENSORTEX

Völk's SENSORTEX delivers excellent breathability, premium waterproofness and sets the bar for technological standards a little higher.

wind and waterproof
very breathable

Available in:

Waterproof: 20.000 mm H₂O
Breathability: 20.000 g/m²/24 h

Waterproof: 15.000 mm H₂O
Breathability: 15.000 g/m²/24 h

Waterproof: 10.000 mm H₂O
Breathability: 10.000 g/m²/24 h

Waterproof: 5.000 mm H₂O
Breathability: 5.000 g/m²/24 h

CPi-INSULATION

The new COMFORT PAD INSULATION is fabricated of an innovative microfibre weave creating maximum heat insulation. CPi is up to ten times lighter and thinner than conventional insulating materials. CPi also helps retain twice the body heat compared with other polyester insulators of the same thickness of material.

PRIMALOFT SPORT

PrimaLoft® Sport is the perfect combination of high performance insulation and value. This technology combines ultra-fine and multi-diameter fibers for specific performance characteristics. The specially treated ultra-fine fibers help to form a water resistant insulating structure, while the multi-diameter fibers help to build loft.

DOWN

Our down jackets contain the perfect mixture for sporting activities of down and feathers. The rich fluff of the feathers used is extremely filling and of particularly high quality. The high proportion employed ensures both the elasticity and stability of the jackets.

4-WAY STRETCH

4-WAY STRETCH offers maximum mobility to promote comfort. Unlike many other stretch fabrics, this material is flexible in all directions.

2-WAY STRETCH

Thanks to its soft, comfortable fit, 2-WAY STRETCH is perfect for technically challenging, sporting performance. Very lightweight, pleasant to the touch and highly flexible, all adding up to a whole new kind of mobility.

LIFTPASS POCKET

The left sleeve of your jacket contains a special Liftpass Pocket which is invisible from the outside. This practical little pocket is reliably kept closed by means of a hidden Velcro fastener above the seam. At the same time it enables you to pull out your ticket quickly and conveniently at all times.

PERFORMANCE dryWEAR

The PERFORMANCE dryWEAR material guides moisture away from the body extremely quickly. On the surface, the functional material distributes the water molecules rapidly and thus enables faster evaporation. The skin remains pleasantly dry.
