RB-5

THE RB-5 RECUMBENT
EXERCISE BIKE:

DESIGNED USER COMFORT
WHILST NOT COMPROMISING
ON PERFORMANCE.

PRODUCT ID

SKU : 20450

EAN : 5412002205409

The RB-5 recumbent exercise bike is not only incredibly stylish looking with its sleek and classic easy step through design, but the reworked ergonomic design makes it perfect for longer workouts with reduced chance of injury.

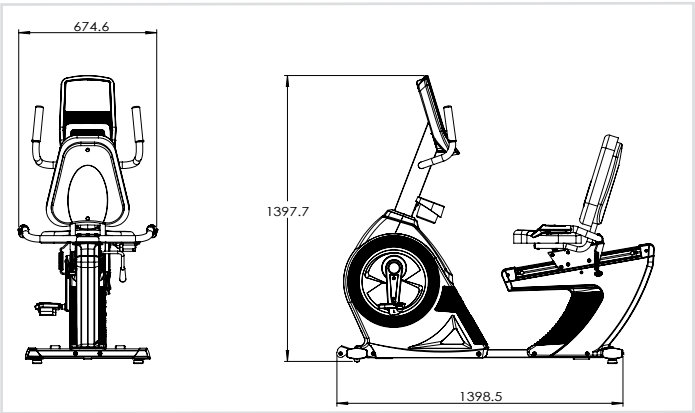

The heavy 11kg flywheel produces a consistent, smooth and quiet pedalling action while the extra wide 41cm multi-adjustable seat, wide pedals and tilting console provide a really comfortable workout position for a wide range of different users.

The low step-through and sturdy fixed handles either side of the console also make this bike an excellent choice for those with limited mobility.

The upright back support and integrated hand rests offer an easy and comfortable riding position, and makes the RB-5 incredibly easy to use and train with.

The digital resistance range available on the RB-5 allows you to easily select and adjust the digital resistance directly from the console, and offers an intensity range of 10 to 400 Watts in 5 Watt interval steps, meaning you can accurately specify your desired intensity.

Cardio training is easily programmed using Heart Rate controlled Target Zones. Just strap on the optional Bluetooth HR strap, and link automatically to the console for a stable and more accurate heart rate registration.
