FUEL GAUGE FUNCTION

3 seconds after pressing the Function button it becomes the fuel gauge. The colour of the button now indicates the approximate percentage of battery power left.

When the battery only has 5% charge remaining the light will automatically switch to the low/flash setting and the function button will flash red.

FUEL GAUGE TABLE

LED	BATTERY %
GREEN	100 - 50
AMBER	50 - 25
RED	25 - 5
RED FLASH	5 - EMPTY

USB CHARGING

Warning: Ensure your light is totally dry and salt free before unscrewing the button cap

Pull back tab back towards the button - do not remove

1. Unscrew Button cap until USB charge port is visible - around 5 rotations
2. Insert Exposure lights charger cable

NOTE: Do not remove the cap completely

The function button will flash whilst charging

When the battery is fully charged the function button will turn solid green

Charge time 1.5 hours

ATTENTION

The RAW head lamp is built to function in the harshest marine and outdoor environments. To guarantee a watertight seal ensure the button cap is screwed down finger tight and the silicone band is covering the charge port hole.

If the unit is being stored for long periods please ensure the battery is periodically charged fully.

WARNING

Exposure Lights are very powerful lighting systems. Always take care when operating. Do not look directly into the light. This may cause serious injury. Do not shine directly at others.
