Release the Button till you feel good. When reaching the maximum or minimum volume, a tone will advise. The volume of each audio source can be individually tuned.

Noise Dependent Volume Control

The Speaker volume will be automatically increased according to the noise level, and when the noise disappeared for a while, the volume automatically restores back to the original level.

FAQ:

1. Can not power on

It might low battery, please try again after charging for 3-4 hours, then plug and unplug the USB connector to reset the device.

2. No sound

Please check if the speaker is correctly fixed, or the volume is too low.

3. Speakers have echo

Maybe they are too close to the microphone, please move the speakers away from the microphone to a normal distance.

4. Disconnect with mobile phone

Make sure if it is low battery, if not, the distance between the headset and mobile phone within 10m or between them exist obstacles that absorb frequency signals like metals or water?

5. Can not pair with mobile phone

Clear all the pairing information according to user manual, and then put the headset and mobile phone together within 1m and try to pair after entering password 0000.

6. Fail to connect with mobile phone

Please make sure the mobile phones support Bluetooth function and Bluetooth HFP, A2DP and AVRCP or other related protocols.

7. Abnormal instruction of charging indicator

A. When the headset haven't been used for long time or overused, it need to be pre-charge for an hour, then pull out and insert the charger, it will indicate normal charging. Please don't count the pre-charging time into normal charging time.

B. Try another charging cable or charger.

8. Whether or not support using while charging

No, we do not recommend to use while charging.
