#### **4. Set up watch with App**

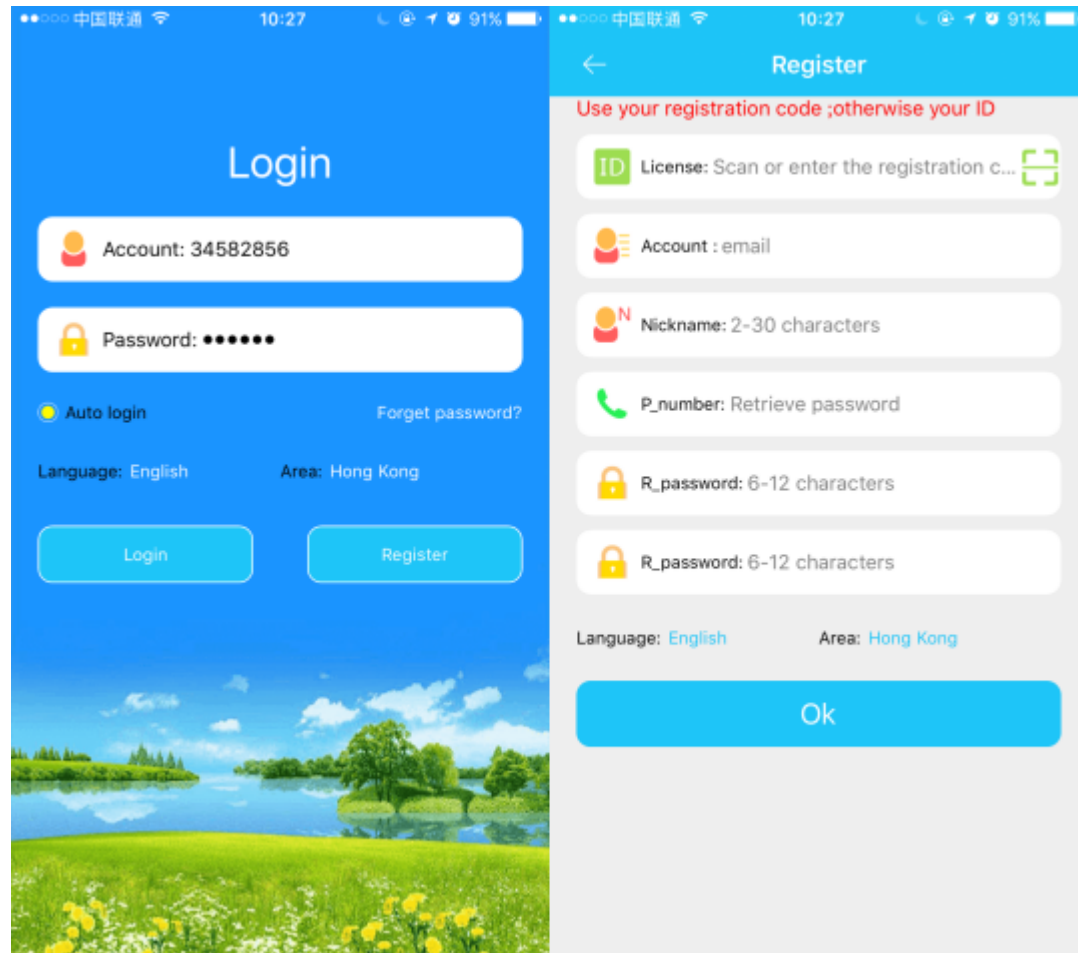

##### **4.1 APP Registration and login**

App only available on IOS and Android , Windows phones do not support.  
Search "Setracker" on App store and Google play or scan the bar code of the last page

manual to download and enter the following page shown on the pic1.

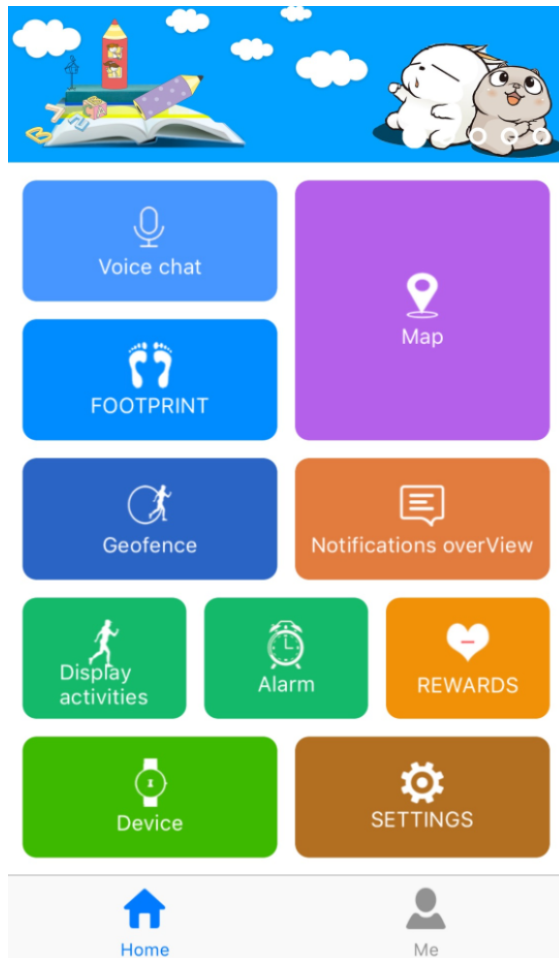

Fill into the unique ID of the watch(by scanning the QR code or entering the ID manually) and unique user name (at least 4 characters, whether letter or number) before login, the P-number is parents' number, then set the password (at least 6 characters),at last select the server location which your country belongs to.

The login interface is shown as below: pic2

#### 4.2 Introduction of APP main interface

Enter the correct account and password on the login interface, click to login and enter the main interface. The main interface is shown as below:

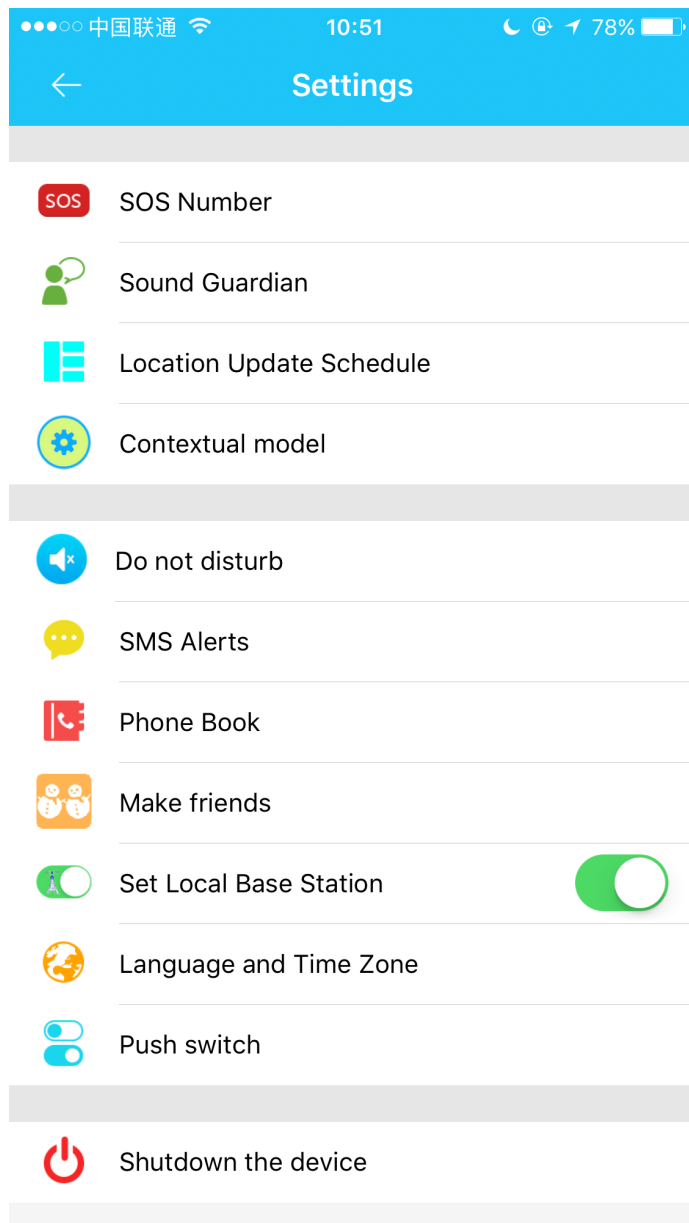

Description of functions:

(1)**Voice chat**: Click “Long press and speak” to start recording. Release the button to send the message. The longest voice message can be 15 seconds.

(2) **Map**: Check the position of the watch in real time. Each positioning working time is 3 minutes. The interval time for location data updating need 20 seconds. After 3 minutes, device will back to the default working mode. You can know the real-time location in the map.

(3)**Settings**: you can set all parameters of the watch, settings interface shown as below:

- a. SOS number: three numbers can be set up, the watch will calling to the phone automatically by pressing the watch SOS button for 3 seconds in case of emergency, and there will have alert message sent to APP. Three phone numbers will be called one after another twice (unless the call is answered).
- b. Monitoring: generally parents' phone numbers are set as monitor number. Once the phone number confirmed, the watch will call the monitoring number automatically, please do not make any sound then you will hear the sound around kids. But the watch cannot hear the sound of mobile phone.
- c. Synchronization intervals: three models can be chosen according to customer's requirements, the default working mode is every 10 minutes; power saving mode to update location is every 1 hour, and the real-time positioning mode is 1 minute.
- d. Sound settings: Ring, Mute, can be set according to customers' need.
- e. Class mode: also named No disturbing time, you can set three periods, all incoming calls will be shielded during three periods, watch lock only SOS calling work, this

function is suitable for kids on class. Class mode only works from Monday to Friday, weekends are excluded.

f. Notification settings: with low power, SOS alarm messages switches. If the power less than 20% and press SOS button over 3 minutes, alert shown on the watch (default off), at the same time send SOS alert to phone.

g. Phone book: There are 15 numbers can be added and the number and name display on watch, these number be allowed to call the watch and vice versa.

h. Quick connect with your friends: with 2 KT04 watches installed with the same SIM card operating company, get touch then both phone numbers will be added in the Contact of App.

i. Set Local Base Station: This is LBS, if turn on there will have LBS positioning display on the MAP. It's better to turn off this feature once positioning is far away from the real-time location.

j. Language and Region: If the time display on the watch is not correct, you can choose the time zone to fix. But this function only works when the watch is connecting to the APP.

k. Remote shutdown: Watch cannot be shut down by pressing button after it starts to work, but it can be turn off from APP.

**(4) GEO fence safety area:** it's minimum radius is 200 meters, when users go in and out of the fence, there will has alarm information when kids out of the fence.

Note: fence alarm information only when the watch GPS is triggered, base station (LBS) positioning fence has no alarm information.

**(5) Love rewards:** select the number of red hearts on the app, click the number send to watch, then watch screen will display the number of love heart.

**(6) Watch alarm:** can be set up three alarm clocks, and alarm clock can be set according to requirements.

**(7) Device:** it is to search the watch, when watch is not around, click this function key the watch will ring for a minute for searching the watch and it will stop ringing by pressing any key.

**(8) Footprint:** This function is used to check the history route of kids in different period. The location data can be saved up to 90 days.

**(9) Display activities:** you can see the records of step count, amount of exercise, distance and sleep monitor.

**(10) Notification overview:** you can see the earlier notifications.
