---

(1)SOS/The family number
Up to 3 numbers can be set as SOS family numbers. When watch user makes SOS emergency call, monitor phone will receive alert message. Watch will make circular calls to the 3 numbers in turns for 2 rounds until someone answers the call. If nobody answers the call after 2 rounds dialing, SMS message will be sent to monitor number (default "off).

(2)Monitoring
Input guardian's phone number and click "ok" to send remote monitoring command. After getting the command, watch will dial monitor number automatically. When the cell phone answers the call from watch, guardian is able to hear the watch user's surroundings, while the watch user cannot hear sound from the mobile phone.

(3)Work mode
Three basic work modes with different upload interval can be chosen.
Normal Mode: every 10 minutes
Power Save Mode: every 60 minutes
Follow Mode: every 1 minute

---

(4)No disturbing time
All incoming calls will be shielded during No disturbing time.

(5)SMS alerts setting
Set to send SMS message to cell phone under the following situations:
a) watch battery is low (low-voltage)
If switched on, when the remaining battery of watch (shown in percentage) reaches below 20%, the watch will send alert message to monitor number (default "off").
b) watch user uses SOS function (SOS remind)
If switched on, the watch will send alert message to monitor number (default "off") if the SOS call was not answered.
Please refer to the SOS function.
c) watch user take off watch (take off watch)
If switched on, the monitor phone (default: off) will receive message when the watch is taken off.

---

(6)Touch your friends
The watch will shows the friend's ID when you successfully made friend with each other, watch can only make one friend unless deleting friend to make a new one Change friend: delete friend on APP then make friend with other kids.

(7)Telephone
Preset up to 15 phone numbers with names, which will be displayed in the watch's phone book. Two-way phone call between the watch and the preset phone numbers is allowed.

(8)Language and time zone
Set language and time zone based on the watch user's location. Time and date on watch display will update automatically.

(9)Push switch
Enable or disable the switch of "take off the watch" to get alert message or not.

(2) Device List: to view registered watch ID, to add or delete watch. Multiple watch IDs can be monitored under one account.
Note: If the watch ID is already registered independently under another account, it cannot be added as second device. The ID used for registration cannot be deleted.
(3) Change password: to change account login password

---

6. Troubleshooting

If the watch fails to connect to the server and display disconnection on APP when turned on for the first time. Please confirm:
(1)The sim card is properly installed and screen display is normal;
(2)The sim card is GSM sim; please note CDMA sim card is not supported;
(3)The sim card has activated 2G data traffic and have sufficient credit;
(4)The parameters including ID, IP and port of the watch are correct.
Send SMS message "pw,123456,ts#" from cell phone to watch. Then the watch will reply its parameters in returned SMS. Make sure the watch is turned on with SIM card installed and the SMS message was edited under English input method. Any further questions, please contact your supplier.
Check watch ID in device list, if the ID is different from the ID in QR-code, then watch are not available to connect with APP.

Below list the correspondent IP and Port for each region.

Region	ip	port
Hong Kong	58.96.181.173	8001
Europe and Africa	52.28.132.157	8001
Asia and Oceania	54.169.10.136	8001
North America	54.153.6.9	8001
South America	54.207.93.14	8001
