

At Odlo, we are proud to engineer durable products that have a long lifespan and are multi-functional

We continue to use mainly synthetic fibers, as well as natural materials such as wool and down and we have very **high quality standards** for all the materials we use

## GENERAL ADVISE:

---

To make sure your product will last several years, please follow our **General recommendations** but always pay attention of the sewn in care label as every garment requires a different type of care.

- \* Do not allow laundry to become too dirty but still try to **wash your sportswear only after 2 to 3 uses** and air it out in between sessions. This will help you keep the material's function a lot longer.
- \* Keep dirty laundry in a well aired and dry place and do not leave lying around for too long.
- \* Always **turn your garments inside-out** before washing. It will preserve the colors and the prints longer
- \* **Close all the zippers**, buttons, velcro etc. as to minimize the risk of the fabric getting damaged during the wash cycle
- \* We always recommend to use **eco-labelled, liquid and mild detergents**. Please **respect the dosage's** recommendation. Excessive dosage will make it harder to rinse and reduce the material's function.
- \* **Do not use bleach** as to prevent discoloration and loss of function
- \* **Do not use fabric softener** as to prevent loss of function
- \* **Wash with similar** colors and fabrics. It is preferable to wash your sports and active-wear together
- \* **Do not tumble dry** if you can avoid it. *(except for Down, see specific care recommendations)*
- \* **Avoid ironing**. If you must iron, turn your garments inside-out.

## WASHING
