

**This user manual must be given to the final customer**

**EN Thank you for choosing PLUM bindings.**

**Skier Instructions**

Downhill skiing, ski touring, ski mountaineering and other winter sports are hazardous activities, which involve risks of injuries. Skiing on the slopes of a ski resort or off-piste include inevitable dangers for every skier. Your binding was designed to release both sideways and forward and in case you fall. However, the pressure which is necessary to release cannot be adjusted. As a consequence, it does not meet the current DIN/ISO safety norms.

**The PLUM RACE bindings are designed especially for expert skiers who have accepted the above mentioned concept.**

**1**

**- Heelpiece**

A 4mm gap must be respected between the boot insert and the heelpiece housing. This 4mm gap is set with the spacer provided with the bindings.

On the PLUM RACE 99, there are two mounting positions (depending on the skier's weight) corresponding of two release sideways values: Low (DIN 6) and High (DIN8).

Mounting positions:

**4**

**- Toe piece**

On the PLUM Race 99, there are two positions: locked position and unlocked position.

Please note that the locked and unlocked positions (as shown in the illustrations below) are required by the ISMF rules.

Locked Position

Unlocked Position

**Maintenance**

You must wipe your ski bindings clean (salt, dirt, dust...etc)

You must rinse them with water and then you must wipe them dry immediately before your store them. The fastening of the toe piece and the heel adjustment screws (5) must be checked before the next use.

If necessary, spread silicon lubricant or PTFE on the bindings. We highly recommend the PLUM lubricant which was specifically made to resist against the repetitive friction of the metallic pieces and extremely cold temperatures. Your bindings must be stored in a dry and ventilated

**2**

**Mounting and Setting**

The performance of your ski/boot/binding system requires proper mounting. We highly recommended having the bindings mounted by a specialized dealer equipped with a drilling template.

A specialized Dealer will follow the ski and binding manufacturer's instructions in order to obtain the optimum level of release/retention in the ski/boot/binding system.

The release setting must be done according your own experience and your personal specificities (height, weight, Skier Classification, age, sole length) The setting done by a specialized dealer IS ONLY ACCURATE WHEN DONE WITH THE EXACT SAME BOOT AS THE ONE USED FOR ADJUSTMENT and usage cannot be directly transferred to a different boot. If the boots are replaced, the release setting should be recalibrated.

The fastening of the heel adjustment screws (5) must be checked before the first use, and then routinely during the ski season. **Please, always take the Torx screw driver with you during a ski session.**

**Important :**

Bindings must always be aligned. It means that the boot heel insert (15) must touch the two heel pins (13) at the same time when you put your ski shoes on. Risk: broken toe pins (1), modification of the release value and creating of a little play in the heel pins.

**5**

**Limited warranty**

Guide bindings carry a LIMITED WARRANTY free of any material and manufacture defects for a period of two years from the date of purchase with a valid proof of purchase. The binding is the only part that we warranty, skis, boots, mounting or others are excluded.

This warranty does not extend to damage caused by improper mounting, misuse, abuse or neglect (e.g. unprotected transportation/storage, not following the user manual). Regular wear, an accident, a product modification or for any aspect/colour modification are also not covered by a limited warranty.

PLUM shall not be liable or responsible for incidental or consequential damages. A number of countries or states do not agree on warranty restriction or responsibility, hence some of the aforementioned restrictions may not apply in some cases.

For any inquiries, please bring the product and proof of purchase to the closest specialized dealer.
